LANE PRESS INC. BURLINGTON, VERMONT

## RESOLUTION

---

Resolution relating to the publication of the Sixty-eighth Annual City Report, adopted at a meeting of the Board of Aldermen, held on the 16th day of January, 1933.

### CITY OF BURLINGTON

In the year one thousand nine hundred and thirty-three.

*Resolved*, By the Board of Aldermen of the City of Burlington as follows:

That the City Clerk is hereby directed to prepare for publication the Annual Reports of the City Officers for the year 1932 and such other matter as is usually published in the City Reports, and under the direction of the Mayor, to procure printed Fifteen Hundred (1,500) copies thereof, for taxpayers and general distribution, and that said copies be printed and ready for distribution at least two weeks before the Annual City Election. That bids for the printing and binding of above said report be asked for by the Board of Finance.

Approved January 17, 1933.

J. HOLMES JACKSON,  
*Mayor.*

## TERMS OF OFFICE

---

The term of office of the Mayor and Aldermen commences the first Monday in April; of the School Commissioners, the first day of July.

STREET, WATER, CEMETERY, POLICE, FIRE AND LIGHT COMMISSIONERS—One appointed in April each year for a term of three years, from April 25 next following his election, and until his successor is appointed and qualified.

CITY ASSESSORS—One appointed in March each year, for a term of three years, from April 1, following his election, and until his successor is appointed and qualified.

PARK COMMISSIONERS—One appointed in April each year for a term of five years.

BOARD OF CHARITIES—One appointed in April each year, for a term of three years; from the 25th day of the same April and until his successor is appointed and qualified. Overseer of the Poor, appointed between April 25 and May 1, with approval of the Board of Aldermen, to serve one year from May 1 following his appointment and until his successor is appointed and qualified.

BOARD OF HEALTH—One appointed in April each year, to serve three years. Health Officers appointed by the State Board of Health. Inspector of Milk and Food and Inspector of Plumbing appointed by the Board of Health.

BOARD OF LIBRARY COMMISSIONERS—One appointed by the Trustees of the Fletcher Free Library and one by the Mayor, to serve two years.

BUILDING INSPECTOR AND DEPUTY—Appointed in March to serve two years.

All other officers one year, from April 25, except the Superintendent of Water Works, the Superintendent of Streets and the Superintendent of the Electric Light Plant, who are annually appointed between April 25 and May 1 to serve one year from the first day of May, following his appointment or until his successor is appointed and qualified.

## MAYOR'S MESSAGE

*To the Honorable Board of Aldermen of the City of Burlington, Vermont:*

GENTLEMEN:— Agreeable to our charter, we have met today to take up the control and regulation of the business of this City for the coming year. To properly administer City affairs, requires thoughtful and efficient effort, with agreeable and cooperative action. The City's welfare must always be borne in mind as we have pledged ourselves to be in our official duties faithful and impartial.

It is with great pleasure that I welcome our five new members who today begin their service in the affairs of our City. I am sure that they will find the work interesting and that their presence on the Board will be mutually beneficial. Without Unity it is impossible to secure proper results and I hope for your hearty and continuous cooperation.

### FINANCE

Our last fiscal year, considering the economic conditions, ended with a fairly good credit balance, due to the cooperation of the Board and to most of the Departments keeping within their appropriation.

This being the first year of the State Income Tax, we will lose thereby about \$8,000.00 from our intangibles, but this amount will be paid to the City by the State around October 15th, of this year. I also wish to inform you that our Street Department by this law will lose about \$26,000.00 as they formerly had 20% of the intangibles.

Last year our Charity Department had an appropriation of \$40,000.00 and an overdraft of about \$6,500.00. This Department has spent during the first three months of this year \$27,272.07 and taking into consideration the amount of \$5,500.00 contributed to the Mayor's Unemployment Fund which has helped this Department out that amount, and without which the gross expenditure of the Department would have been \$32,772.07, making an average of over \$10,000.00 a month. Some action will have to be taken to meet the large drain on this Department. Probably, as I see it, in cutting down the appropriation of other Departments where advisable. I would request that your Board meet with the Finance Committee in the near future to consider what action should be taken in this matter. I would also inform you that our interest account on Bonds and Notes will be increased about \$10,000.00 this year over last.

## BONDS

There is in the sinking fund at present \$68,214.87 to meet the payment of bonds when due, we also, according to the Charter, each year appropriate 5% of the Grand List amounting to about \$12,000.00 which also goes to the payment of our Bonds.

This year \$25,000.00 of our bonds become due, next year \$65,000.00 are due and the year after \$201,000.00. In order to meet this obligation it will be necessary that the Electric Light Department save about \$75,000.00 each year for the next two years and that the Water Department also save about \$30,000.00 a year for the same period. I see no reason why this cannot be done, thereby keeping the good name and credit of our City. The taxpayers are to be congratulated that they have these departments, as it is with their help that we are enabled to meet these obligations, otherwise, increased taxation would become necessary.

## STREET DEPARTMENT

Our Streets have been kept in good condition, with but a few exceptions, and the roadbed of the several approaches to our City is worthy of commendation. This year will probably finish the last of the Bond Issue voted by the taxpayers for permanent road work. In my message last year I recommended the widening of South Winooski Avenue between College and Pearl Streets. This has been done and a great improvement is noted in traffic conditions in this section.

Work is now in progress on the new trunk line sewer. This project was very much needed from the City's health standpoint and when finished will serve the City for many years to come.

## CHARITY DEPARTMENT

I call your attention to the great increase in the expenses of this Department, due of course to unemployment caused by economic conditions. The drain on this Department is likely to continue for I see no immediate signs of improvement. This Department is being managed with great efficiency and much hard work.

The Mayor being entitled the Chief Executive Officer of the City would seem to imply that he has large authority. There is nothing he can really execute, however, until some other officer having authority under the law, or some department of the City government grants permission. He enjoys and exercises authority to a certain extent and has

a limited veto power, but the veto is not to execute, it is to stay execution. I say this because a large number of people are possessed with the idea that the Mayor can right all wrongs and in a sort of accessory sense is a party to all offenses that may escape punishment.

I am thoroughly appreciative of the honor of being Mayor of this City and of the responsibilities connected with that office. It is my earnest hope as well as my conviction, that you will join in doing your full share to make our City a place of beauty, order and contentment.

J. HOLMES JACKSON,  
*Mayor.*

April 4, 1932.

## REPORT OF THE BOARD OF AIRPORT COMMISSIONERS

January 1, 1932 to December 31, 1932

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—During 1932, Burlington Airport was further improved in the following ways:

1. Leveling and grading about the hangar by tractor and drag.
2. Hangar doors repaired and over-head track replaced.
3. Cement markers at ends of run-ways painted international orange.
4. Two large trees removed on the property adjoining, in order to clear approach to field.

5. Through the courtesy and co-operation of the School Committee of the Town of South Burlington, the Airport now has an Administration Building—the former “little red schoolhouse.” The town of South Burlington is giving the use of this structure without charge. The building has been partitioned off into three rooms; the interior has been painted, linoleum placed on the floor, and a workshop and bench installed. Visiting pilots now state that Burlington has the best Administration Building in the State.

During the past year, there were twenty-four active students at the airport. Seven students have received private licenses and three others have made their solo flights and are preparing for the private license examinations. One student airplane mechanic expects to receive his master mechanic's license shortly.

An event that created considerable interest and much enthusiasm was the Airplane Model Contest for boys, held under the auspices of the Airport Commission. Some sixty airplane models, many of remarkable workmanship, were entered by the boys. The judges were Paul Schill of Milton, Lieut. Lyle Churchill of Plattsburgh and Harold W. Pugh, local airport manager. Prizes were awarded, the first three prizes consisting of round trip airplane rides to Plattsburgh, N. Y.

Burlington Airport is now official headquarters of the Vermont Airplane Pilots' Association and, at present is the only flare station in Vermont for American Airways. During 1932, sixty-seven out-of-town ships landed at our port. The Plattsburgh-Burlington air-line is still in operation and reports that business is picking up.

The immediate needs are proper lavatory facilities, cement floor in

hangar, and later, some lights for night flying. Also, considerable leveling and grading must soon be done on the run-ways, which are getting a bit rough in some places.

Following is account of receipts and expenditures:

## RECEIPTS

Appropriation.....	\$ 1,200.00

JOHN J. BURNS, *Chairman*,  
 ALFRED K. HEININGER, *Sec'y*,  
 BEN B. LANE.

## REPORT OF THE BUILDING INSPECTOR

*To the Honorable City Council:*

GENTLEMEN:—The usual routine work has been carried on during the year.

As in past years, special attention has been given to the location of street lines as a protection to both the property owner and the city.

The first draft of the code is in the hands of the Ordinance Committee and is in process of being condensed in line with a Code text for the smaller cities of New England now being developed by the Code Committee of the New England Building Officials Conference, of which I am a member, this will have the full effect of the Uniform Code by reference and will relieve the smaller cities of the expense of publishing the complete Uniform Code. I have attended several meetings of this Committee and very satisfactory progress is being made.

A summary of the years operations is attached to this report.

*Respectfully submitted,*

R. L. SOULE,  
*Building Inspector.*

January 17, 1933.

REPORT OF THE  
**CEMETERY COMMISSIONERS**

*To the Honorable, the City Council:*

GENTLEMEN:—We enclose the report of the Superintendent of Cemeteries, together with the receipts and disbursements for the year 1932.

As we have no funds available for the development of the addition to Lake View Cemetery, it will be necessary for us to have an appropriation for this purpose.

There are approximately thirty lots left for sale and as these are not all desirable it is imperative that we open the addition this year.

We ask that a committee from your Honorable Body be appointed to confer with the Cemetery Commissioners regarding this matter.

*Respectfully submitted,*

Jan. 30, 1933

FRANK J. HENDEE,  
R. C. MILES,  
EVELYN P. DEYETTE,  
*Cemetery Commissioners.*

## REPORT OF THE SUPERINTENDENT OF CEMETERIES

*To the Board of Cemetery Commissioners:*

I herewith submit my annual report of the Cemetery Department for the year ending December 31st, 1932.

The usual routine work has been done during the past year and the Cemeteries kept in as good condition as possible.

The building at Elmwood has been repaired and painted and is now in good condition.

The tool house at Greenmount has also been repaired and painted and is in good repair.

I would again ask you to have the new part on the north of Lake View put in condition as there are only 30 lots left in Lake View and most of them are not very desirable.

All outstanding bills have been paid and at the close of the year each Cemetery shows a balance on the credit side.

In closing my report I wish to extend my appreciation to your Honorable Board for the assistance which you have given me the past year.

*Respectfully submitted,*

WALTER R. CLAYLAND,  
*Superintendent.*

Unexpended balance.....		\$ 18,239.17

Three thousand nine hundred eighty-eight days work has been given the city by men receiving aid from this department. Work divided as follows: Unloading flour, 41 days. Park Dept., 440 days. School Dept., 128 days. Water Dept., 892 days. Street Dept., 2,487 days.

On December 31, 1932 there were 745 families and 1,863 children under our care.

*Respectfully submitted,*

ETHEL B. MILDRAH,  
*Overseer of the Poor.*

## REPORT OF THE CITY ATTORNEY

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—I have instituted 48 prosecutions under the City ordinances in Burlington City Court in 1932. Of these, 46 were for violations of the traffic ordinance, 1 for ringing a false fire alarm and 1 for driving over a fire hose. 4 cases were nol prossed and convictions were obtained and fines imposed in 44 cases, all of which will appear in detail in the report made to you by the Clerk of the City Court.

I have made frequent attempts to secure from the State Tax Commissioner a settlement of the claim of the City presented before my last report, for rebates for State Taxes paid on illegal taxes which were assessed for several years previous to 1931 and am assured now by the Commissioner that he will settle this claim very shortly.

I have collected some bills for several City Departments and have many other bills on hand for collection but am unable to collect the same at present because of existing economic conditions.

I have given the tax collector frequent counsel in regard to his powers and duties and drafted the new ordinances passed by you during the year.

I have rendered several written opinions to various City officials and as usual, have been called upon frequently to give them counsel in regard to the discharge of their official duties.

At the May term 1932 of the Supreme Court I argued the case of Grand Lodge of Vermont F. & A. M. vs. City of Burlington, the suit to which I referred in my last report, and the Court at the October term 1932 handed down an opinion and gave judgment in this case in favor of the City.

No further matters occur to me that require mention.

*Respectfully submitted,*

THEO. E. HOPKINS,  
*City Attorney.*

January 16, 1933.

## REPORT OF THE CITY COURT

*To the Honorable City Council, City of Burlington:*

GENTLEMEN:—During the year 1932 there were forty-eight (48) cases filed in Burlington City Court, by Honorable T. E. Hopkins, City Attorney, on account of violations of City Ordinances, as follows:

Parking without lights .....	13
Not complying to traffic signs.....	9
Parking not close enough to curb.....	8
Parking on bus stop .....	7
Parking overtime.....	7
Crossing intersection against red light.....	2
Ringing false alarm.....	1
Driving over fire hose.....	1
<hr/>	
Total.....	48

In forty-five (45) of the above innumrated cases, there were convictions and three (3) of these cases were nol prossed. In all of the forty-five (45) cases wherein convictions obtained, there were fines imposed aggregating in all in the sum of One Hundred Ninety-nine (\$199.00) Dollars. From the total amount of fines imposed, there is deductable the sum of Forty-eight (\$48.00) Dollars as and for Clerk's fees to Adrian J. Simays, leaving a net balance to the City of Burlington, of One Hundred Fifty-one (\$151.00) Dollars.

*Respectfully submitted,*

ADRIAN J. SIMAYS

*Clerk.*

## REPORT OF THE CITY GRAND JUROR

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—The following report covers the activities of this office from January 13, 1932, to February 1, 1933:

Offense	Continued	Convicted	Discharged	Bound Over	Nol Prossed	Dismissed
Intoxication . . . . .	0	289	0	0	4	1
Habitual Drunkard . . . . .	0	28	0	0	0	0
Breach of Peace . . . . .	0	39	0	0	7	0
Petit Larceny . . . . .	1	8	1	0	0	0
Grand Larceny . . . . .	0	0	0	2	0	0
Receiving Stolen Goods . . . . .	0	1	0	0	0	0
Burglary and Attempted Burglary . .	1	7	0	1	1	0
Adultery and Lesser similar Offenses	2	3	0	0	1	2
Non-support . . . . .	0	7	0	0	9	2
Vagrancy . . . . .	0	5	0	0	0	0
Possessing Intoxicating Liquor . . . .	0	6	0	0	1	0
Driving while Intoxicated . . . . .	0	4	0	0	1	0
Taking Automobile without consent of Owner . . . . .	0	2	0	0	0	2
Leaving Scene of Accident . . . . .	0	3	0	0	1	0
Other Automobile Violations . . . . .	0	32	1	0	0	2
Delinquency . . . . .	0	5	0	0	0	0
	4	439	2	3	25	9

On search warrants obtained, liquor was found in six instances; none was found in twenty-four.

Chief of Police Cosgrove, Sheriff Dimick and all the members of

the Police and Sheriff's Department have co-operated most willingly and efficiently at all times, and I wish to take this opportunity of expressing my appreciation of their assistance. I must also acknowledge my indebtedness to Judge Hamilton S. Peck for his wise counsel; to Adrian J. Simays, Clerk of the City Court, for many helpful and accommodating acts, and to Miss Mary C. Alafat, who, as Second Grand Juror, prosecuted on a number of occasions.

*Respectfully submitted,*

J. H. MACOMBER, JR.,  
*City Grand Juror.*

REPORT OF THE  
**CITY ELECTRICIAN**

*The Honorable Mayor, and Board of Aldermen:*

GENTLEMEN:—I have the honor to submit to you my annual report of City Electrician for the year ending January 1, 1933.

The Police Signal is in very good condition. I have changed the Police Signal Cable to ten (10) new poles which have replaced old ones.

The Fire Alarm System is in good condition except for the old boxes which have been in service for over Fifty years and have been burned out several times and for which I cannot get the needed repairs, these boxes should be changed for later type as soon as possible. I have changed approximately seven and one half ( $7\frac{1}{2}$ ) miles of Fire Alarm wire during the year.

*Respectfully submitted,*

E. K. PRESSEY,  
*City Electrician.*

REPORT OF THE  
**ELECTRIC LIGHT COMMISSIONERS**

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—In submitting to you the regular annual report of our Superintendent which has our approval and also the financial statement of the Electric Light Department for the year of 1932, we would again call your attention to the increasing earnings of this department and again recommend that a part of the excess earnings be put back in the equipment of the plant towards improving its street lighting system, for which plans have been worked out applying to each project with maps and estimates—all available at the office of this department. This recommendation is made more particularly in view of the fact that the amount paid to the City Treasurer in 1932 was quite in excess of what the City called for towards its Sinking Fund and request that at least \$25,000 annually be appropriated towards improved street lighting.

The Commission would also recommend that a 2c per kilowatt hour block be added to our present rate schedule, believing that such additional rate block would be decidedly promotional and bring additional revenue to the department.

The Commission desires in this report to express its appreciation of the loyalty of Mr. Tozer our Superintendent and his fellow employees of our department.

*Respectfully submitted,*

H. H. MILLER,  
J. E. LANOU,  
A. B. ROONEY,

*Commissioners.*

January 27, 1933.

## REPORT OF THE ELECTRIC LIGHT DEPARTMENT

*To the Board of Electric Light Commissioners, Burlington, Vt.:*

GENTLEMEN:—In submitting to you my report for the year 1932 I wish to call your attention to several of the projects that have been completed and also recommend to you further improvements to the property of the Electric Light Department. These improvements should, of course, be of such a nature as to either add to the earnings of the department, improve the service, or reduce the operating and maintenance expense.

Last year no new major improvements were attempted. The steel tower line extending from the corner of Battery and Pearl Streets to the Plant was completed. Upon the completion of this new line all of the old poles and wires were removed and a dependable line of sufficient capacity now connects the main parts of the distribution system of the City with the generating station. A portion of the east end of this line was placed underground so that no unsightly poles and wires obscure the view of the Lake and Mountains from Battery Park.

Since the time when the Department generated its own power a large power boiler has been used to heat the various buildings and office at the Plant. With the present arrangement of transmission and tie lines the likelihood of needing steam power is very remote. Therefore, it was decided to install a small low pressure heating boiler. This is completely equipped with an oil burner and economizer and will show a great saving in the amount of fuel used for the heating of the plant and office.

During the year a new two and one-half ton truck was purchased and is now in daily use. This is fully equipped with all the latest equipment for line work, including power winches, a pole setting device, etc.

The cost of maintenance was slightly more than last year but we believe the service has been improved in many parts of the City, low voltage conditions have been corrected and the general condition of the distribution system has been improved.

A general system of inspection and testing of meters has been carried on during the past year. Meters brought in for inspection that were old and likely to be inaccurate were removed and new modern type meters used.

During the past year, equipment purchased at the time the Department was organized was found to have been fully depreciated. Proper entries have been made, deducting these items from the plant accounts and charging them to their corresponding depreciation reserves. The effect of this is that the depreciation for this year is somewhat lower than it has been in the past years as some of the items had been depreciated more than their original cost.

The amounts listed as due from consumers of light and power shows a considerable increase over the amount due at the end of the previous year. Therefore, it was thought to be advisable to increase the reserve for doubtful accounts from \$10,000.00 to \$15,000.00 providing for possible losses of delinquent accounts.

As you will note the income of the Department increased from \$278,601.05 to \$287,675.24 and the profit from \$85,331.22 to \$117,115.65. The amount of cash left in the hands of the City Treasurer at the end of the year amounted to \$93,035.36.

We have carried on an active campaign on the sale of ranges, two cooking schools were held in the Auditorium of the City Hall during the past year. They were very well attended and a great deal of interest was shown in electric cookery. This seems about the only way the load and income can be increased and we believe this plan should be continued and an active effort made to build up the income and profits by this method.

No Street Lighting projects were carried out last year. Estimates are available and plans made for a comprehensive street light program whenever it is thought desirable to install all or any portion of it. It has been suggested that the different projects be discussed and a decision made as to just where the beginning should be made and a certain amount of money be used every year out of the income of the Department and a section built, and continue this plan until it is completed.

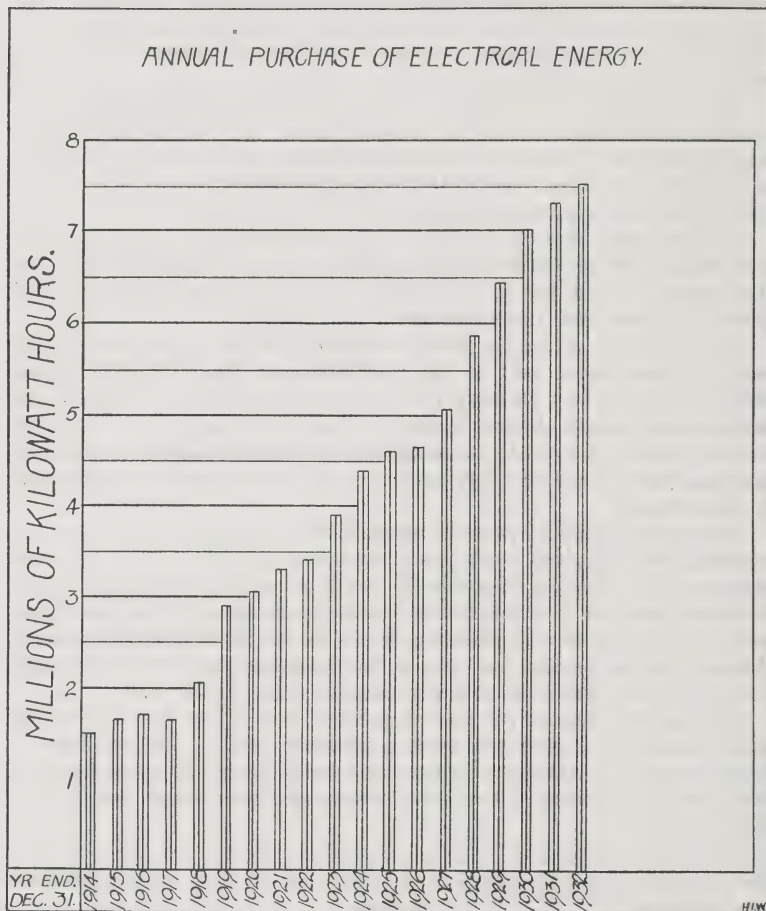

It has been shown by past experience that about one-half of the money spent for underground work is for labor, quite a portion of which could be unskilled, this would relieve to a small extent the unemployment situation as all common labor could be arranged for through the Charity Department.

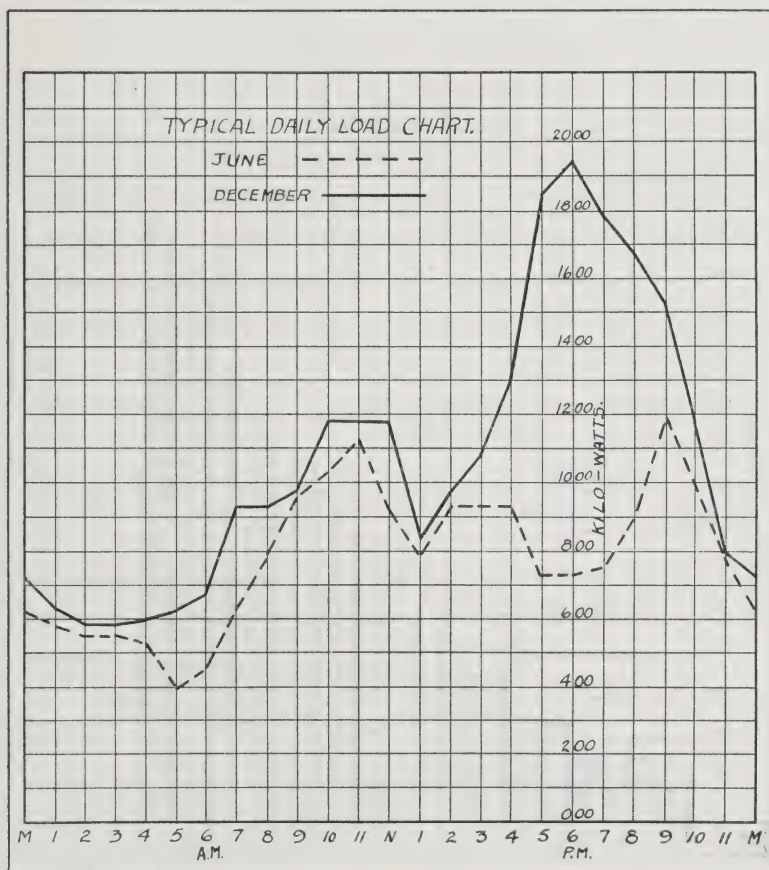

I wish to thank you for your cooperation during the past year and am sure that with the support of the people of the City the Department can continue to be a benefit to the City.

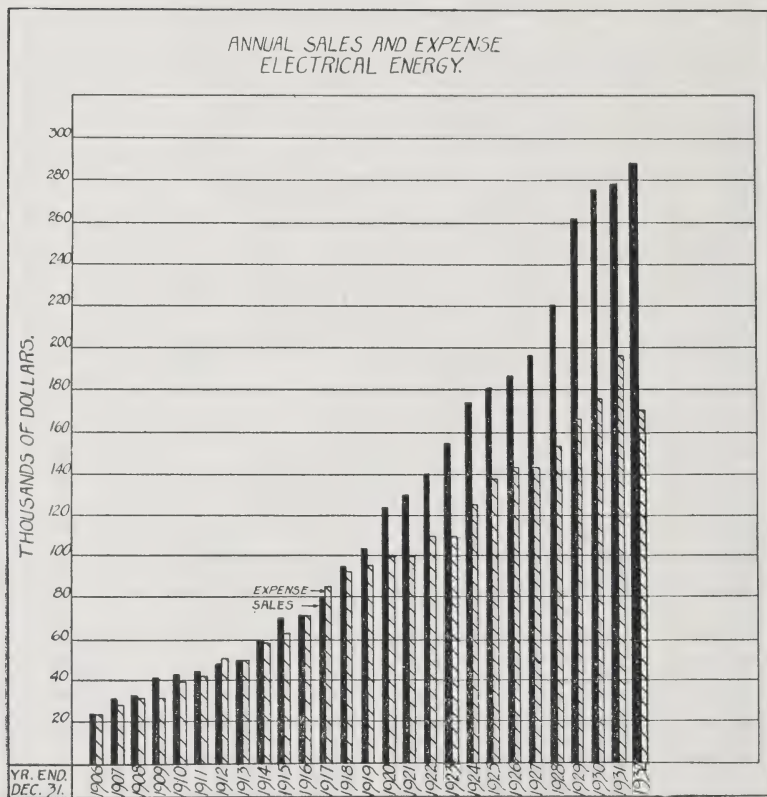

*Respectfully submitted,*

J. R. TOZER,  
*Superintendent.*

Pensions .....	11,840.00
Abatements .....	5,000.00
Total .....	\$821,264.89
Amount of estimated saving in School Department Appropriation if teachers and other employees of that Department make a contribution beginning with School Year, per letter from Superintendent Lyman C. Hunt, dated June 29, 1932. ....	\$ 7,500.00
	\$813,764.89
Deficit for 1932 .....	5,498.71
	\$808,266.18

In submitting the foregoing, we wish to call your attention particularly to the increase in the amount which it is estimated will be required by the Charities Department this year, namely \$70,000.00, which represents an added burden that must be provided for in this year's Budget.

After several conferences between ourselves and with the City's Auditors, we have prepared the Budget herewith submitted, for your consideration and adoption.

It will be noted that the estimated expenditures exceed the estimated receipts by approximately \$13,000.00. We are informed however, by the Superintendent of Schools, that the teachers and other employees of the School Department, are considering a contribution to the City, equal to a ten per cent reduction in salaries for the balance of the year, and if they decide to make this contribution, and all Departments keep within their appropriations, our deficit for the year will be only approximately \$5,500.00.

It is hoped that through entertainments, individual contributions, etc., the Budget may be balanced, as it is particularly desirable that no deficit exist at the close of the year.

Practically all Departments, except those whose appropriations are governed by law or ordinance, have been cut approximately 10% or more. Some Departments, including Parks, Snow Removal, etc., have been cut considerably more than 10% because it is hoped that able bodied men obtaining aid from the Charities Department, will be willing to work for such Departments for the compensation received.

*Respectfully submitted,*

J. HOLMES JACKSON,

F. W. SHEPARDSON,

W. O. LANE,

*Board of Finance.*

REPORT OF THE  
**FIRE COMMISSIONERS**

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—We hereby submit our report for the year ending December 31, 1932.

The Board has held meetings monthly, relative to finances, conduct, affairs, and discipline of the Department, and report a fine sense of loyalty and discipline among the officers and men of the Department.

The report of Chief Engineer Stockwell shows an itemized account of expenditures, also recommendations of apparatus and supplies, necessary for the good of the Department, which we unanimously endorse and recommend for adoption as early as can be conveniently done.

The Board wishes to express its appreciation of the cooperation it has received from the Mayor and the Board of Aldermen.

*Very respectfully,*

J. H. MIDDLEBROOK,  
G. D. McBRIDE,  
F. A. DEYETTE,

December 31, 1933.

*Commissioners.*

ANNUAL REPORT  
OF THE  
**CHIEF ENGINEER FIRE DEPARTMENT**

*To the Honorable Board of Fire Commissioners of the City of Burlington:*

GENTLEMEN:—According to the City Ordinance I have the honor to submit the annual report of the Fire Department of the City of Burlington for the year ending, December 31, 1932.

MANUAL FORCE

The manual force consists of thirty-nine permanent men. One chief-engineer; one assistant-engineer; four captains; seven chauffeurs; and twenty-six hose and ladder men.

HOUSES

The city owns four fire houses—fire headquarters (Central Station) S. Winooski Avenue, with offices of the chief-engineer, assistant chief-engineer, also the Gamewell fire alarm room and apparatus.

APPARATUS

Central Station No. 1. One Seagrave 1,000 gallon pump 130 horse power, with 80 gallon tank for booster pump, twelve hundred feet two and one-half inch double jacket rubber lined hose, two hundred feet three quarter inch rubber hose for booster pump.

One Seagrave 750 gallon pump, 130 horse power, with 80 gallon tank for booster pump. Twelve hundred feet two and one-half inch double jacket rubber lined hose. Two hundred feet three-quarter inch rubber hose for booster pump.

One Seagrave tractor-drawn 85 foot aerial ladder truck. The main stick is 45 feet long with extension of 40 feet, so when raised it reaches a height of 85 feet. On main stick is mounted a Morse ladder pipe with thirty-five feet of three inch double jacket rubber lined hose, this pipe is used as a water tower. There is also three hundred and sixty feet of ladders, including extension roof and wall, also pike poles, plaster hooks, door opener, tin roof cutter, cellar pipes and large pull down hook with chain and rope.

Station No. 2. One Seagrave 750 gallon pump, 130 horse power, with 80 gallon tank for Booster pump. One thousand feet of two and one-

half inch double jacket rubber lined hose. Two hundred feet of three quarter inch rubber hose for Booster tank. One Draeger smoke protector.

Station No. 3. One Selden combination auto truck with one 40 gallon chemical tank. One hundred and fifty feet of three-quarter inch rubber hose for chemical tank. One thousand feet of two and one-half inch double jacket rubber lined hose.

One Chief's car which is housed at Fire Station No. 4. on South Union Street.

The department has in reserve one two-horse drawn Seagrave city service ladder-truck with three hundred and twenty feet of ladders, including extension, wall and roof, also axes, pike poles, forks and shovels.

The department has ten 2½ gallon extinguishers on apparatus, also four 2½ gallon extinguishers in fire alarm room.

One Ford ton-truck; one old American LaFrance combination chemical and hose truck.

#### THE FIRE ALARM SYSTEM

The fire alarm system is of the Gamewell make and is located at the Central Station in two fire-proof rooms, and consists of two-six-circuit central office type storage battery switchboards. One recording set consisting of one Excelsior punching register, one Excelsior time and date stamp with clock. One Peerless take up reel, one Excelsior transmitter in one hundred wheel case, one hundred transmitter wheels, one fast and slow transformer, one six-circuit-repeater. Two hundred and sixty-two F. I. P. battery, one motor generator set, two forty entrance cabinets, four engine house recording sets with Excelsior punching registers, four peerless take up reels, four ten inch turtle gongs for engine houses, four six inch gongs at Central Station, four engine house transfer switches, four sixteen inch gongs for slow time, eighty street boxes, fifty-eight miles of aerial wire and one and one-half miles of under ground cable, two street sirens and one tower bell.

#### HOSE

The department has on hand, seven thousand and six hundred feet of two and one-half inch double jacket rubber lined hose in good condition and three hundred feet in poor condition. Seven hundred and fifty feet of three-quarter inch rubber hose in good condition and two hundred feet in poor condition. Thirty-five feet of three inch double jacket rubber lined hose on ladder truck in good condition.

#### ALARMS

During the year your Department has responded to two hundred and fifty-nine alarms. There were fifty-four bell alarms and two hundred and five still alarms. Of these there were twelve false alarms, and fifteen

calls for assistance from other towns as follows: South Burlington, six; Shelburne, three; St. Albans City, one; Williston, one; Colchester, one; Vergennes, one; Charlotte, one; and Ferrisburg, one.

#### COST OF MAINTAINING DEPARTMENT

The cost of maintaining the department for the past year was \$65,725.65; Salaries \$58,230.83; Fuel \$2,334.25; Repairing Truck, \$428.75; Gasoline \$688.89; Lights \$637.91; Telephones, \$332.35; Laundry, \$205.23; Water \$130.15; Ford Truck, \$90.00; Uniforms \$1201.00; Repairs and supplies, \$1,446.29. Appropriation \$64,050.00 making an overdraft of \$1,660.65.

#### RECOMMENDATIONS

I recommend that the city purchase a thousand gallon pumping engine with booster tank to be housed at Fire Station No. 3, Mansfield Avenue, and to place the Selden combination truck in reserve for an emergency.

That a portable turrit pipe be purchased and carried on one of the pumps at Central Station, as the Hart turrit pipe that the department had is beyond repair, parts cannot be purchased as the company has gone out of business.

That the Department purchase 3,000 feet of hose at once.

That additional fire alarm boxes be purchased from time to time so as to cover districts unprotected as the city grows.

I recommend that a fire alarm box be installed in each school building.

I recommend that an ordinance be passed compelling the installation of automatic sprinklers in the basement of all mercantile buildings, hotels and public halls where large numbers of people are accustomed to assemble.

I recommend that where there is a sprinkler system installed that it shall be connected with an outside auxiliary fire alarm box connected direct with the fire alarm system. By so doing the Department does not have to rely on some one hearing the outside bell on building but the Department gets the alarm direct thereby responding at once, saving time and undoubtedly a large water damage.

I recommend that the two inch water main now in service on Bradley Road be replaced with a six inch main, that hydrants be installed and so located that adequate water may be had in case of fire for the protection of life and property at the City Alms House.

#### REMARKS

During the year the Department has run  $4\frac{1}{2}$  miles of new wire for fire alarm system, also has changed 3 miles of wire from the upper

to lower position on poles. There is still about 17 miles to be changed so as to comply with the order of the Public Service requirements.

The Department has responded to two-hundred and fifty-nine alarms the past year. The insurance paid on these fires was, Buildings, \$47,626.35; Contents, \$39,264.99; total \$86,891.34. There was also insurance paid on fires unattended by the department, Buildings, \$965.71, Contents, \$904.82; total of \$1,870.53, making a total fire loss of \$88,761.87. Of these fires the largest losses were at the Beaupre Block, \$8,814.54, W. C. Arms, Barn, \$12,607.80, Mrs. J. H. Sternbergh, House, \$33,000.00, The Burlington Paper Stock Co., \$7,178.00.

Drills have been held by the Drill Master at the tower on Mansfield Avenue during the summer months.

A new pumper should be purchased to take the place of the American LaFrance, which has been in service since Feb. 13, 1911. New parts for moter (if they can be purchased) and other repairs would cost more than the machine is worth.

Four men were placed on pension after examination by Board of Medical examiners.

Edward Lafayette	Appointed Sept. 15, 1906	Pensioned July 9, 1932
George Lamudge	Appointed Feb. 13, 1911	Pensioned July 9, 1932
Bert Mills	Appointed Feb. 4, 1915	Pensioned July 9, 1932
Frank Whitehouse	Appointed July 7, 1920	Pensioned Nov. 1, 1932

## REPORT OF THE FIRE WARDENS

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—We beg to submit the following report as Fire Wardens for the year ending December 31, 1932 as follows:

Number of Inspections made.....1,038

The splendid co-operation of the merchants located in the inner fire district has in the past year greatly reduced the fire hazard caused by accumulation of rubbish in cellars, and this co-operation is greatly appreciated.

### RECOMMENDATIONS

We recommend that provision be made whereby the members of the fire department make periodic inspections of the larger buildings in the city, to better acquaint them with the inside layout. We believe this would prove of great value in case of fire, and would assist them in combating smoke, gas, etc.

In closing this report we wish to express our appreciation to His Honor Mayor Jackson and to your Honorable Board, also to the citizens of Burlington for their kindness and support.

*Respectfully submitted,*

W. E. Carty, Ass't Chief,  
M. L. Thurber, Wire Inspector  
N. Lavery, Captain,  
P. C. Ashline, Captain  
J. P. Murphy, Captain,  
*Fire Wardens.*

January 12, 1933.

# REPORT TO THE CITY OF BURLINGTON OF THE SERVICE OF THE FREE DISPENSARY

For the Year 1932

## REPORT OF THE ACTING HEALTH OFFICER

*To the Honorable Board of Health Commissioners:*

I submit the following detailed report of the Health Officer for the year ending December 31, 1932.

### VITAL STATISTICS

During the year 1932, 790 birth certificates, 499 death certificates and 152 marriage certificates were recorded by the City Clerk.

### POPULATION

The population of the city was determined in 1930 to be 24,789 and this figure is used as a basis for computations in this report.

### BIRTHS

There were eighteen fewer births reported in 1932 than in 1931. The birth-rate for 1932 was 31.9; 287 babies were born to non-resident mothers and this reduced the birth-rate to 20.3.

There were 398 males and 392 females born. The youngest mother's age was fourteen years and the oldest forty-five years. Nine pairs of twins were born.

The births exceeded the deaths by 291.

The following tables show the distribution of the births by months and wards, and by ages and nativity of the mothers. There is also a table indicating the division of the institutional births by months and residence of the mothers.

TABLE I—BIRTHS BY MONTHS AND WARDS

Month	N. R.	I	II	III	IV	V	VI	Totals
January	20	28	4	6	7	1	5	71

#### STILL BIRTHS

There were twenty-eight still births reported during 1932, this being eleven more than were recorded in 1931.

## MARRIAGES

Twenty-one licenses were granted to parties contracting their second marriage and three for their third marriage. Nineteen of the parties had been divorced. The youngest female was sixteen and the oldest seventy-three years. The youngest male was eighteen and the oldest seventy-one years.

TABLE IV—MARRIAGES

Months	Number	Nativity of Parties				
		Burlington	Vermont	United States	Canada	Other Countries
January	13	9	5	7	5	0

Totals	152	98	88	84	28	6

## DEATHS

There were seventy-one more deaths reported in 1932 than in 1931. The death-rate was 20.13; 163 deaths were non-residents, this reducing the death-rate to 13.56.

The following table shows the distribution by months and wards, and by ages.

TABLE V—DEATHS BY MONTHS AND WARDS

Months	N. R.	I	II	III	IV	V	VI	Totals

## INFANT MORTALITY

In 1932, 57 babies died before reaching the age of one year. This gives an infant mortality rate of 7.2 percent. This is a decrease of one-tenth percent as compared with that of 1931. Twelve of these babies were born to non-resident mothers, and deducting this, we have an infant mortality rate of 5.7 percent. This is a decrease of .36 percent as compared with that of 1931.

The following table indicates the infant deaths by age and months.

TABLE VII—INFANT MORTALITY

Months	0-1 day	1-3 days	3-7 days	1-2 weeks	2-3 weeks	3-4 weeks	1-2 months	2-3 months	3-6 months	6-9 months	9-12 months	Totals

Totals	144	9	288	132	22	30	1	17	0

TABLE X—COMPARATIVE TABLE OF COMMUNICABLE DISEASES

	1925	1926	1927	1928	1929	1930	1931	1932
Diphtheria	28	14	9	7	21	11	15	9
Poliomyelitis	1	1	0	1	1	0	3	0
Measles	15	185	209	82	1	10	232	288
Mumps	304	6	24	46	109	4	4	132
Scarlet Fever	32	115	36	28	12	6	13	22
Smallpox	0	0	0	12	26	1	33	17
Typhoid Fever	1	0	2	0	1	2	2	1
Whooping Cough	13	129	70	7	39	6	92	30
Chickenpox	64	50	43	86	58	64	35	144

During the year 1932, we have had epidemics of measles, mumps, chickenpox and a few scattering cases of smallpox, diphtheria, scarlet fever, and whooping cough.

During the past year, many instances have been observed where families have had a communicable disease and failed to report the same. Such neglect as this tends to make it nearly impossible to prevent the spreading of infectious diseases, and it is hoped that this practice will be stopped, and better cooperation shown in this matter.

#### SANITARY INSPECTION

During the past year, restaurants, barber shops, meat markets, bakeries, theaters and other public places have been inspected and recommendations made whenever indicated.

#### CITY DUMP

The city dump on Interval Road has been used extensively during the past year with the result that many unsightly and unsanitary spots within the residential district have been cleaned up and made less of a fire hazard.

#### GARBAGE COLLECTION

It has been necessary to replace two of the horses used in this department during the past year; otherwise no changes have been made and the service has been found generally satisfactory.

*Respectfully submitted,*

ERALD F. FOSTER, M. D.,  
*Acting Health Officer.*

## REPORT OF THE MEAT INSPECTOR

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—I herewith submit the following report as Meat Inspector for the year 1932:

Number Beef carcasses inspected.....	1,100
Number Pig carcasses inspected.....	1,757
Number Veal carcasses inspected.....	1,164
Number Lamb carcasses inspected.....	361
Number Beef carcasses condemned.....	40
Number Pig carcasses condemned.....	28
Number Veal carcasses condemned.....	82
Number Pounds of pork condemned due to souring.....	221
Number Parts of carcasses condemned.....	12
Number Carcasses inspected and Passes.....	4,382
Number Carcasses inspected and Condemned.....	150
Number Store and Market inspections.....	403
Number Slaughter-house inspections.....	127
Number Cooler inspections.....	52

The sanitary conditions of markets have improved during the past year. Many new Electric Refrigerating Systems have been installed. All wholesale coolers in the city are now equipped with electric refrigeration except one and that will be installed during the coming year.

*Respectfully submitted,*

DR. H. L. MILLS,  
*Meat Inspector*

January 28, 1933.

## REPORT OF THE MILK INSPECTOR

*To the Honorable City Council of the City of Burlington:*

I hereby submit the annual report of the Milk Inspector for the year 1932.

The activities of the Milk Inspector come under the following heads:

1. Licensing.
2. Farm Inspection and Physical Examination of cattle.
3. Inspection of Stores and Wholesale Places.
4. Check-up on T. B. Tests.
5. Chemical and Bacteriological Analyses of Milk.

1. *Licensing.* Licenses were issued as follows:

Store .....	133 at	\$5.00	\$665.00
Distributors .....	30 at	10.00	300.00
Summer .....	2 at	2.00	4.00
			<hr/> \$969.00

Money from this source was received and turned over to the city treasurer.

2. *Farm Inspection and the Physical Examination of Cattle.* 198 farms were inspected in regard to their relation to the milk supply of Burlington. This means a careful inspection and examination of all utensils that come in contact with milk while it is being handled at the barns as well as the inspection of the barns and water supply. I made a physical examination of 3,444 cows of which 45 were condemned, and during the year, at different times I isolated cows from herds for different diseases. The inspection and physical examination is considered to be of the greatest importance for clean milk.

3. *Inspection of Stores and Wholesale Places.* Inspection of 244 stores and 157 wholesale places, where milk is sold, were made during the year. It is interesting to see how many places, both retail and wholesale, are installing electric refrigeration every year.

4. *Tuberculin Test.* All herds in this locality are signed up for state and federal supervision, so all milk coming into the city is from tuberculin tested cows.

5. During the year 228 samples of milk were purchased from the dealers and turned over to the Laboratory of Hygiene of the State Department of Public Health for analyses. These findings were published

in the local newspaper in July and January for the information of the public. In accordance with the city ordinance chemical and bacteriological standards are fixed as follows:

Total Solids, at least.....	11.75%
Solids not fat, at least.....	8.5%
Butterfat, at least.....	3.50%

On the following pages will be found a summary of all analyses of milk as offered for sale during the year.

*Respectfully submitted,*

J. A. RUST, D. V. M.,  
*Milk Inspector.*

## REPORT OF THE INSPECTOR OF PLUMBING

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—I hereby submit my report for the year ending December 31, 1932.

Number of Permits issued for plumbing in new buildings .....	38
Number of fixtures installed in same .....	219
Number of Permits issued for new or additional plumbing in old buildings .....	68
Number of fixtures installed in same .....	200
Number of permits issued for plumbing in old buildings which pre- viously had no sewer connections or plumbing .....	4
Number of fixtures installed in same .....	57
<hr/>	
Total number of permits .....	110
Total number of fixtures installed .....	476
Water test new buildings .....	38
Smoke test new buildings .....	0
Water test old buildings .....	36
<hr/>	
Total number of inspections made .....	396
Inspections made at request of the Health Officer .....	12

In my 1931 report I told about out of town Plumbers coming here and doing plumbing work without getting acquainted with the Plumbing Ordinance, or getting a permit before they started work. This practice has continued this past year and it was necessary to have some work taken out and replaced at the owners expense. If property owners would ask for information when they hire a Plumber who is not acquainted with the Ordinance, much time and expense could be saved. In cases where the property owner hires a Plumber who is not registered he is held responsible.

To the members of the Board of Health, I wish to extend my thanks for their support during the year.

*Respectfully submitted,*

JOSEPH E. MOORE,  
*Plumbing Inspector.*

## VITAL STATISTICS

## BIRTHS IN 1932

# REPORT OF THE BOARD OF LIBRARY COMMISSIONERS

## OF THE

### FLETCHER FREE LIBRARY

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—The Board of Library Commissioners of the Fletcher Free Library respectfully submits the following report for the year ending December 31, 1932:

#### FINANCIAL STATEMENT

##### RECEIPTS

Appropriation.....	\$7,200.00	
Interest .....	553.96	
		<hr/> \$7,753.96

##### DISBURSEMENTS

Salaries .....	\$6,216.07	
Telephone.....	66.00	
Lighting.....	160.82	
Postage.....	40.50	
Fuel.....	655.07	
Sundry Supplies.....	126.47	
Water.....	7.60	
Printing.....	11.85	
Repairs on building and renewal of equipment...	99.66	
Insurance.....	260.40	
Binding.....	78.83	
Laundry.....	10.40	
Unexpended balance.....	20.29	
		<hr/> \$7,753.96

We are pleased to report that by granting a request of six of the Patriotic Societies of Burlington for the use of a room for storing their records, books and historical relics, an agreement was entered into whereby the unfinished west gallery room on the second floor of the

Library building was attractively finished off, the Societies bearing the entire expense in accordance with specifications satisfactory to the Board.

We would refer you to the Librarian's report for a detailed account of the work of the Library for the year.

*Respectfully submitted,*

D. A. LOOMIS,  
HAROLD SLOCUM,  
HENRY L. WARD,  
EDMUND C. MOWER,  
*Commissioners.*

REPORT OF THE BOARD OF TRUSTEES  
OF THE  
**FLETCHER FREE LIBRARY**

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—In behalf of the Trustees of the Fletcher Free Library, I have the honor of presenting the Librarian's Report for 1932.

Evidently the Library has never meant more to our city than this year as the Librarian reports a circulation of 110,964 books and magazines, a gain of 11,364 over 1931.

The enforced leisure of the unemployed has turned hundreds to the Library who have learned to enjoy the free recreation of the reading-room and the privilege of borrowing books for home reading.

The details of administration are given in the accompanying report of the Librarian to whose leadership, with the able cooperation of his assistants, credit is due for the efficient service rendered during the year.

*Respectfully submitted,*

MARGARET C. BUELL,  
*Secretary.*

# REPORT OF THE LIBRARIAN OF THE FLETCHER FREE LIBRARY

The annual report of the Librarian for the year ending December 31, 1932, the fifty-ninth since the opening of the Library is respectfully submitted.

## CIRCULATION

Number of days open.....	303½
Number of books issued for outside use.....	110,964
Number of pictures issued for outside use.....	100
Gain in circulation over 1931.....	11,364
Largest daily issue, November 12.....	700
Smallest daily issue, June 2.....	153
Average daily issue.....	365
Percentage of non-fiction circulated.....	38 7/10
Percentage of fiction circulated.....	61 3/10
Books issued per capita.....	4 47/100

The business depression and consequent unemployment have resulted in a marked increase in the use of the Library. The circulation of 110,964 books and magazines for home use is the largest in the history of the Library and is a gain of 11,364 over that of 1931. The registration was increased by 1,203 new borrowers, making the total registration approximately 8,500.

The circulation by classes compared with that of 1931 is given in a supplementary table at the end of this report.

## ACCESSIONS AND CATALOGUING

Received by purchase.....	843 vols.
Received by gift.....	274 vols.
Transferred from the pay duplicate collection.....	206 vols.
Total additions.....	1,323 vols.
Withdrawn.....	1,639 vols.
Decrease for the year.....	316 vols.
Number now catalogued.....	56,095 vols.
New titles catalogued, 1932.....	946
Number of periodicals received.....	125 titles

Although our additions were 47 volumes more than last year, 1,639

volumes no longer of use were withdrawn and discarded which reduces the number now catalogued to 56,095 volumes. This number will doubtless be reduced eventually one hundred more owing to the indifference of some borrowers about returning books or feeling any responsibility about them.

Of the total additions for the year, 946 volumes were new titles classified as follows:

Reference and General Works.....	31
Philosophy.....	18
Religion.....	19
Sociology.....	53
Education.....	12
Science.....	19
Useful Arts.....	47
Fine Arts.....	16
Music.....	37
Recreation.....	16
General Literature.....	36
Poetry and Drama.....	42
Travel.....	54
History.....	40
Biography.....	87
Fiction.....	232
Juvenile Books.....	187

An effort is made each year in selecting books for purchase to include those that seem to be the most timely and promise to be of permanent usefulness in the Library. With this in view, several books bearing upon International Relations and Economic Conditions were added, the most important being two books by Frank H. Simonds: "Can Europe Keep the Peace" and "Can America Stay at Home;" also "War Debts and Prosperity" by Harold G. Moulton and Leo Pasvolsky; "The Way to Recovery" by Sir George Paish, "Recovery, the Second Effort," by Sir Arthur Salter, and "A Basis for Stability" by Samuel Crowther.

A short list of other important books added that have been in great demand, deserving of special mention, are the following: "Autobiography of Lincoln Steffens," "A Princess in Exile" by Grand Duchess Marie of Russia, "The Epic of America" by James Truslow Adams, "Twenty Thousand Years in Sing Sing" by Warden L. E. Lawes, "These Acres," a book of verse, by Frances Frost, a Vermonter by birth and a former resident of this city.

The usual demand for the latest novels has received due attention, 232 new titles having been purchased, the most popular ones being:

"Sons" by Pearl S. Buck, a sequel to her former Chinese novel "The Good Earth," "The Fountain" by Charles Morgan, and "A Sheltered Life" by Ellen Glasgow.

#### READING AND REFERENCE ROOM

The reading room has achieved a new usefulness this year, and greater demands have been made upon our services and resources than ever before. Scores of the unemployed have found that this attractive room with free access to the daily papers and interesting magazines is a pleasant place, well-worth while, in which to spend idle hours.

Hundreds of requests for information are answered from this room. Material for debates, club papers, club programs, and collateral reading for schools all receive due attention.

Doubleday's Encyclopedia in eleven volumes, with Annual Supplement, and Vermont of Today, in four volumes, by Arthur F. Stone, were valuable additions to the reference collection this year.

#### CHILDREN'S ROOM AND WORK WITH SCHOOLS

Circulation of fiction from children's room.....	13,122
Circulation of non-fiction from children's room.....	8,963
Total circulation.....	22,085
Number of new books for children's room.....	274
Number of school rooms supplied with books.....	32
Number of books issued for school rooms.....	2,365
Number of stereographs and pictures issued for school rooms...	100
Number of books issued from school rooms for home use.....	7,478

This year the birthday centenaries of Lewis Carroll and Louisa M. Alcott were outstanding events in the juvenile literary world. The immortal Alice gained many new young readers and brought back some of older years who read anew the wonderful adventures of this fascinating child. Neither have the years dimmed the charm of Miss Alcott's books. They are still so beloved that no year passes that several titles do not have to be replaced in duplicate.

Among the new books purchased for this room the most valuable and useful were the new revised Compton's Pictured Encyclopedia in 15 volumes and a new edition of The World Book and Guide in 22 volumes, the old editions of these books being given in exchange and part payment for the new.

The service given to the schools has been continued, and visits have been made to the Library by several classes for the purpose of learning about the Library and how to make the best use of it.

## MISCELLANEOUS

The Library has been the grateful recipient this year, from a long list of friends, of a considerable number of very acceptable gifts of books, pamphlets and magazines. We desire to make grateful acknowledgement to the local papers for publishing items of interest to the public. The Daily News has also given space generously during the year for printing annotated lists of our new books.

No changes have taken place in the Staff. During July and August, Seymour Bassett served most satisfactorily as vacation assistant. The greatly increased work of the year has been carried on without a corresponding increase in the Staff. Much commendation is due my assistants for the efficient and willing service which has made possible such gratifying results of the year's work. I desire to extend my grateful appreciation to them for their hearty cooperation in the administration of the Library, and to the Board of Trustees and the Board of Library Commissioners for their support and counsel during the year.

*Respectfully submitted,*

GEORGE DANA SMITH,  
*Librarian.*

## REPORT OF THE BOARD OF PARK COMMISSIONERS

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—The Board of Park Commissioners respectfully submits herewith the annual report of the work done during the year 1932.

The activities in the Park Department were very much curtailed during the year. The total expenses were slightly less than 55% of those of the year 1931. The appropriation was greatly reduced and the receipts for the various activities showed a decided drop. There are also some outstanding bills to be collected.

The Department was forced to close the playgrounds at the end of four weeks. During this time they were crowded with children of all ages. The attendance during this time showed how greatly the children and their mothers appreciated them. For example, at one of the larger playgrounds, the attendance on a half-day basis was 8,195 and the cost of supervision was less than one cent per child per day.

No new improvements were installed and the amount spent for supplies was reduced to a minimum. The attempt was made to spend the greatest percentage possible to help the labor situation. During the summer and especially the fall and winter, the department gave considerable work to men sent by the Poor Department. This labor was used at South Park, but chiefly at Ethan Allen Park and the Bathing Beach. With this help the Department was able to cut out many dead and dying trees and to remove much of the underbrush. This has greatly improved the appearance of these parks.

The attendance at the parks, especially the Bathing Beach, was probably the largest in many years. Many people had more leisure than usual and they availed themselves of the opportunities offered at the parks.

The Tourist Lodge entertained parties from many states, but the number of people camping out was greatly decreased. The receipts from this source were only 61% of those of the previous year. This trade is being taken care of by private homes and private cabins.

The street trees have had considerable attention and they are in fair condition. About 200 young elm trees have been set out on the parkways.

South Park was used by Burlington and Cathedral High Schools for baseball and by the former for football. There were some semi-professional baseball and football games, but the attendance was small.

For the first time, night baseball was played at South Park. Unfortunately it began to rain in the early afternoon and the game did not start until after 9. P. M. However there was a reasonable attendance and an excellent game. This type of amusement will grow rapidly in popularity when business conditions improve.

The chief work has been the maintenance of the parks and many small triangles. These were kept in good order.

The Board wishes to express its appreciation of the continued co-operation which it has received from the Mayor and Board of Aldermen during the past year.

*Respectfully submitted,*

T. F. CONLON, *Chairman*,  
J. J. FLYNN,  
F. R. WELLS.  
CAROLINE S. JACKSON,

## REPORT OF THE BOARD OF POLICE COMMISSIONERS

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—We hereby submit our report for the year ending December 31, 1932.

The Board has held meetings from time to time relative to the conduct, affairs, and discipline of the Department and we do hereby report a fine sense of loyalty and discipline among the officers.

During the past year the Department has lost one of its trusted and valued officers by death, viz: John F. Brown, died March 12, 1932. He served as a Police Officer for the City of Burlington in a most efficient, faithful and loyal manner. The loss of this Officer is keenly felt by the Department.

During the past year the following changes occurred in the Police personnel: George W. Sinon retired February 8, 1932. Thomas G. Mongeon retired April 1, 1932. Levi Vincent retired November 2, 1932. Joseph A. Fisher was appointed Qualified Special Police Officer, March 12, 1932. Charles R. Ables was appointed regular member of the Department, May 2, 1932. We heartily approve the Mayor's selection in the appointment of these officers.

We recommend again the following changes in the Police Building; a new door cut in the south side of the building to be used as an entrance by the public to the Office upstairs rather than have them walk through the garage; also a new waterproof floor for the part now used as a garage for the Police cars.

We extend our thanks to His Honor Mayor J. Holmes Jackson and the Board of Finance; the Chief of Police and his subordinate officers and to each member of the Department for their loyal support and un-failing courtesy.

ROY LAMSON,  
GEORGE L. AGEL,  
HOWARD F. KILLARY,  
*Board of Police Commissioners.*

January 30, 1933.

## REPORT OF THE CHIEF OF POLICE

*To the Honorable City Council:*

GENTLEMEN:—I hereby submit my report for the year ending December 31, 1932.

The records show that during the year 1932, the number of arrests made by the Department was 577, which are classified as follows:

## ROSTER OF REGULAR POLICE OFFICERS

Charles R. Ables	James M. McGowan
Hubert H. Bates .	Frank J. McCarty
Paul D. Bouchard	Hilas P. Murphy
Frank J. Burns	Frank Plankey
Charles P. Collins	Joseph T. Rock, 1st. Sgt.
James F. Donlin	Frank G. Raymond, 2nd Sgt.
John H. Francis	Donald P. Russell
Joseph A. Fisher	Carl A. Schafer
Albert J. Gutchell	Clayton R. Steady
Frank A. Lavery	Oliver H. Valyou
Arthur L. Limoge	Joseph F. Vincent
Frank J. Medlar	Clarence E. Weston

The Police Ambulance carried 117 sick and injured persons during the past year.

There were 3,384 lodgings given to transients, at the Station during 1932.

Amount appropriated for the Police and Criminal Department, \$49,000.00.

Payroll of the Department, \$43,633.34.

Miscellaneous expenses of the Department, \$4,629.99.

This department has paid to the City Treasurer for service of warrants, the sum of \$1,683.20.

During the year 1932, the Department suffered the loss of one of its officers, through death, John F. Brown, who died March 12, 1932.

Three officers of this department were retired on pension during the year 1932. George L. Sinon, February 8th, Thomas G. Mongeon, April 1st, and Levi Vincent, November 2nd.

Joseph A. Fisher was appointed a Qualified Special Police Officer March 12, 1932. Charles R. Ables was appointed a regular member of this department May 2, 1932.

I wish to thank the members of the Department for their loyalty and for the careful performance of their duties during the past year.

In conclusion, I wish to thank His Honor, Mayor J. Holmes Jackson, and the Police Commissioners for their kindnesses and co-operation.

*Respectfully submitted,*

P. J. COSGROVE,  
*Chief of Police.*

January 12, 1933.

## REPORT OF THE POLICEWOMAN

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—I herewith respectfully submit my fifteenth annual report for the year ending December 31, 1932.

The year has been full of difficult and perplexing problems. The scarcity of work has been responsible for discouraging conditions. We had hoped that the year 1932 would bring relief in this respect but as yet there has been no material change. The ability to work is life's greatest blessing and it gives physical and moral strength. I find that our youth lack training and capability and I strongly recommend a Trade School where they can be trained to be skillful and efficient workers, able to perform when work is available. This will not only be beneficial to those seeking employment but it will be invaluable to the public to be able to employ trained housekeepers, dressmakers, laundresses, gardeners, carpenters, plumbers and so on. Calvin Coolidge once said: "Little progress can be made by merely attempting to repress evil: our great hope lies in developing what is good." Training our young in trades that will make them self supporting is "developing what is good." I firmly believe that if every boy and girl who are not planning on a professional course was obliged to learn a trade it would lessen delinquency and crime. I have long realized the need of a Trade School, it would be a safeguard.

It has been a busy year, there have been many cases that have required thought, anxiety and hard work. I have in every case endeavored to bring about permanent results. More than the usual number of girls and women have been kept in my home and furnished with food and other necessities until plans could be worked out for their benefit. This represents much work and often inconvenience but it is constructive and the results are gratifying.

I have had a number of Court cases and commitments have been made to the State Prison and House of Correction for Women at Rutland and to the State Industrial School at Vergennes.

The Women's Protective League, Inc. continue to give financial aid for emergency cases, thus I am able to help those in immediate need. The League also continue to donate money for useful gifts for those who would not otherwise be remembered at Christmas time. I extend my hearty appreciation.

Through the efforts of Miss H. Barbara Hunt and Mrs. Grace L. Shanley, teachers of Home Economics in the Burlington Senior and Junior High Schools, their classes have for four consecutive years generously contributed Christmas gifts to families whose names I have provided. I am deeply grateful for their efforts.

I extend thanks to the Zonta Club who made a number of children happy with their generous and substantial gifts at Christmas time.

I wish to thank his Honor Mayor J. Holmes Jackson, Chief P. J. Cosgrove and all others who have aided me in my work.

*Respectfully,*

MRS. N. E. L. AUSTIN,  
*Policewoman.*  
*Deputy State Probation Officer for Woman.*

## REST ROOM

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—The patrons of the Rest Room are most appreciative to you for the comfortable and well kept room in the City Hall. It gives our out of town guests a feeling of hospitality as they enter so quiet and orderly a room, with its table of reading matter and easy chairs.

The Committee are very grateful for your support, and we trust in your continued cooperation.

*Respectfully submitted,*

JESSIE P. TAYLOR,  
*President of Rest Room Association.*

February 1, 1933.

# SCHOOL CENSUS REPORT

## TABULATED SUMMARY OF SCHOOL CENSUS

### SECTION 1248—GENERAL LAWS

Burlington, Vt., August, 1932.

The following statistics derived from the census of children of school age, resident in this town, enumeration of which was made in August, 1932, are hereby submitted:

(Between "6 and 8 years" means from sixth to eighth anniversary of birth):

1. Number of children between 6 and 8 years.....	1,285
2. Number of children between 8 and 16 years.....	2,917
3. Number of children between 16 and 18 years.....	760
4. Number of children between 6 and 18 years (sum of preceding items).....	4,962
5. Number of boys between 6 and 18 years.....	2,529
6. Number of girls between 6 and 18 years.....	2,433

*Respectfully yours,*

*Signed: J. A. RUST,  
Clerk of School Board.*

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

January 1, 1932 to December 1, 1932

The sixty-fifth report of the Department of Public Schools and my eleventh report as Superintendent of Schools, is hereby submitted, as required by Section 162 of the City Charter.

Newspaper articles from time to time give the public information regarding the activities conducted in the schools. This report of the School Department is, therefore, confined to tabulated reports of the receipts and expenditures for the past year, certain other statistics dealing with attendance, and to the following brief statement of the Superintendent.

### FINANCES AND ECONOMIES IN 1932

Expenditures in 1932 were \$15,223.56 less than those of the calendar year 1931. In June 1932, after contracts for the school year 1932-33 had been awarded, and after the budget of the School Department had been based upon an appropriation of \$236,792.64, the City Council requested the Board of School Commissioners to cut salaries and reduce expenditures for the year. Since contracts were signed, any reduction in salaries had to be made by voluntary contribution of the teachers. In September the teachers voted to contribute 10% of their salaries from that time to January 1, 1933. Other employees have made similar contributions. The amount saved by these contributions totals \$6,734.03.

Although principals, supervisors and teachers actually contributed \$5,552.93, the detailed financial statement makes it appear otherwise, since the total salaries for teachers were greater in 1932 than in 1931. There are two reasons for this apparent contradiction.

First, in the fall of 1931, a large percentage of the teachers by their own request changed from a ten payment to a twelve payment plan. This threw a larger part of the salaries for the school year 1931-1932 into the calendar year 1932.

Second, increases in salaries for the school year 1932-1933 partly off set the contributions.

In order to meet the demand, that the emergency necessitated drastic reductions, the amount spend for repair and maintenance of buildings and equipment was reduced from \$15,620.70 to \$7,660.64. Expenditures for text-books were reduced by \$1,886.00 or 50%, and cost

of other supplies used in instruction was \$1,142.26 less than in 1931. Slight reductions were made in nearly every item of operation of the plant reducing total cost of operation from \$32,962.48 to \$29,183.46. This summarizes some of the economies effected in 1932.

### AFFECT OF ECONOMIES

When attempting economy, and considering ways and means of maintaining our schools with reduced income, it is important that the welfare of the children should have first consideration. Boys and girls of school age are in no way responsible for this depression and they are entitled to the advantages of the best education and training that can be offered them, in clean and sanitary school buildings, with sufficient text books and teaching materials and under competent and well trained teachers. Any curtailment of the school program that leaves the present generation less well fitted to become useful citizens is false economy. Where then, if we must reduce expenditures, can retrenchments be made that will not endanger the efficiency of the school work?

We can not longer cut the expenditure for text books and school supplies to the same extent as was done in 1932 without injury to the pupils. The expenditure of \$1,805.82 for text books for more than 2,200 pupils (books are not furnished for the pupils of the senior high school) is at the rate of less than 90c per pupil. Certainly anyone will grant that clean, usable text books cannot be placed in the hands of pupils at that cost.

If this situation is but temporary we can delay repairs, such as painting, and varnishing, some carpenter work, etc., until the depression has passed. But it is neither real economy nor good business. Not only does repair work done in this period help to relieve unemployment, but when needed repairs are postponed the costs mount rapidly because replacements must in many cases take the place of simple repair work.

Savings that can be made in miscellaneous items are so small as to be almost negligible. This is due to the fact that salaries, even after contributions were made, totaled \$200,139.70 or 84% of the total expenditures. Certain fixed charges such as fuel, water, lights, telephones, insurance, add \$15,000.00 to \$20,000.00 more. When text books and necessary repairs are added at least 95% of the total budget has been expended. It is evident then that any cut on the remaining 5% of the budget could not at the most amount to more than one or two percent of the total budget.

It is evident then that our school budget can be reduced only by abolishing school courses and activities, by reducing the number of

employees, or by a contribution from employees. These will be discussed briefly in the following paragraphs.

### CURTAILMENT OF THE SCHOOL CURRICULUM

This question should be approached carefully. There are of course demands that the fads and frills be eliminated. Who is to determine what are fads and frills? What is to be the measuring rod?

If the fact that a course is new, regardless of its value, or the demand for it, makes the course a fad, then we have little that can be so classed. In the elementary schools, Reading, Writing, Arithmetic, and Spelling were taught from the very beginning of public schools in Burlington. In a description of the course of study in the Superintendent's report in 1869, we find that Geography was taught in the elementary grades but there was no reference to History courses below the grammar school. Hygiene and physiology were taught then and instruction in drawing was given throughout the grades.

"Manners, morals and habits; singing, gymnastics and familiar conversations on common things, introducing the elements of botany, chemistry and natural philosophy." This is quoted from the report of Superintendent J. E. Goodrich for the year 1869, as part of the outline of the seventh grade course of study.

"Manners, morals and habits" is another name for the work we are now doing in character education and citizenship training. "Familiar conversations on common things introducing the elements of botany and chemistry" is partially descriptive of the course introduced last year in Elementary Science in the lower grades. This year new courses were offered in the high school in Physical Geography, Physiology and Geology. These course are popular and as practical as any studies offered in high school. We also find these mentioned in the high school curriculum of 1869. Sometime since then they were discarded only to be renewed when the present emphasis upon science in every walk of life renewed the demand for them. These are half year courses elected for the most part by students not preparing for college.

Teachers of music and drawing were employed in 1869 and regularly since then the School Department has employed at least two people as teachers and supervisors of these subjects. These courses prepare some students for life's occupation, but more important they offer to all training for valuable use of leisure time. Their importance is emphasized by unemployment, shorter hours, and share-the-work-plans.

Manual Training and Home Economics were introduced together in 1910. They have been offered regularly for twenty two years. More boys and girls are taking these courses than ever before. They have their

value for every one, but they would be justified if pursued only by those who must drop out of school in the ninth and tenth years. If Home Economics does not prepare for life, then no courses were ever offered that do.

When there is little or no demand for a course, we drop it. Spanish has been discontinued for that reason. We felt it poor economy to continue this course for not more than ten people, since it was possible for them to elect either French or German in its place. Additional courses do not mean additional expense in a high school of this size so long as there are sufficient number pursuing the courses to provide classes of normal numbers.

I have no recommendation for dropping courses or activities when such action will deprive children of educational opportunities.

### TEACHING LOAD

We have availed ourselves to some extent of the opportunity to reduce the budget by reducing the number of teachers. The total number of people employed as teachers, principals and supervisors in 1922-23 was 110½; in 1927-28, 111; in 1931-32, 110½ and this year, 1932-33, 106½. The total enrollment for those same years has been 2,967, 3,305, 3,208 and for the fall term only of 1932-33, 3,040.

At the present time the teaching load, that is the number of pupils per teacher based on average membership, is thirty in the elementary grades and twenty-eight in the junior and senior high schools.

While it is possible that this number of teachers may be reduced by one or two, neither the Superintendent or the Board of School Commissioners favor the increase of the teaching load to a point that may in any way result in poor instruction for the individual pupil.

### SALARIES

In September the teachers in a meeting of the Burlington Teachers' Association, voted to return ten percent of their salaries to the City as their contribution to the large appropriation made to the Charity Department. All secretaries and other employees joined the teachers in making this contribution. The action was taken not of necessity, because teachers held contracts that were legal, but because the sentiment prevailed that it was the duty of the teachers to do their share to relieve the burden and suffering caused by unemployment.

This action meant real sacrifice on the part of many teachers, particularly those who were supporting relatives now unemployed and those who are bearing now a larger share of the family expenses, but I com-

mend them for taking the action and express my appreciation for the fine spirit of work that has been shown throughout the year.

I recommend that the present salary schedule be continued and offer the following facts to support this recommendation. The salaries of class room teachers have been slower in reaching a reasonable level than the incomes of any other profession. They should return to the normal scale as rapidly as business recovery will permit. Secondly: teachers are spending more today for professional training and study than at any previous time in history. Finally the schedule of teachers' salaries in Burlington has just reached the level of the median paid in cities of 10,000 to 30,000 throughout the United States.

In 1930-31 the median salaries paid class room teachers in cities of the United States of 10,000 to 30,000 population was \$1,428.00 for elementary teachers; \$1,619.00 for junior high school teachers and \$1,876.00 for high school teachers. The median salaries paid in Burlington under present contracts without deductions would total \$1,350.00 in elementary schools; \$1,650.00 in junior high school and \$1,800.00 in high school.

Our salaries are as good as those paid in Maine or New Hampshire but lower than those paid in Massachusetts, Connecticut or in cities of the same size, though the cost of living is no less. We expect that to be so and this is no argument for higher salaries but it is a plea that the salary schedule upon which contracts for 1932-33 were based, be maintained and continued. If expenditures must be cut after the expiration of the present contracts, let the present method continue until such time as the full salary can be restored.

### ATTENDANCE

School work could be much improved and failures could be reduced by better attendance. Though it is true that a large proportion of the absences are due to illness, on the other hand there are too many instances where pupils are kept out of school to help at home, or to be out of town with parents.

There were last winter and there are again this winter, too many children out of school, often two or three days or more at a time, because of lack of clothing, particularly shoes. In so far as possible, clothing is secured through private charity, when it is impossible to outfit a child in this manner shoes and clothing are secured through the Charity Department as provided by the State Law. But the delay causes many absences.

Furthermore, I feel that too much truancy develops because of failure of the courts to place upon the parent the responsibility for

the child's attendance. Section 1258 of the Statutes of Vermont provides that a parent who fails to cause a child to attend school after one notice that such child has been truant, may be fined not less than five dollars or more than fifty. No parent has, to my knowledge, ever been fined under this Statute.

Recently three boys were sentenced to Vergennes for stealing. All three had long records for truancy. Two of them had been in Court more than once for truancy, but the parents had never been compelled to accept responsibility for causing them to attend school. Many other similar situations can be cited, and we have several other cases that will end by sentence to Vergennes eventually.

I think we have encouraged juvenile delinquency and crime by failure to make parents responsible for causing their children to obey one of the first laws that the juvenile delinquent breaks, namely, the law of compulsory school attendance.

#### VISUAL EDUCATION

The School Department owns sufficient equipment for a much wider use of visual education than we have utilized during the past year. We have in the assembly hall a portable machine that uses 35 mm. film. We also have a portable machine and screen for class room use of 16 mm. film, and a lantern, for the projection of pictures and opaque objects.

At small expense we can equip one room in each building with curtains so that the room may be quickly darkened. Since we cannot afford to have any one person giving his time to the operation of these machines, we plan that at least one teacher in each building shall learn to operate the 16 mm. machine.

Films are available at small expense from numerous sources. These films cover various industries and types of manufacturing and include a wide variety of subjects in geography, history, health, safety, botany, biology and others.

When funds are available it is hoped we may secure a library of films on various subjects. These would then be available throughout the year and from one school year to the next.

#### SUMMARY

We shall urge and insist that wise economy be practiced in every phase of our school work, we shall eliminate waste of time, equipment and materials in every possible way, but we will not recommend re-

trenchments that are unjust or unfair to the school children of any age or class.

I commend the teachers for the efforts and expense that they have personally incurred at Summer School, in Extension Courses and by individual study in order that they might improve their teaching ability and methods. I have seen in a number of cases this year, improved teaching, because of better methods, and more particularly better knowledge of subject matter, secured through additional professional study. In spite of lower incomes, I urge teachers to continue this study and professional advancement.

To all who have contributed to the welfare of the schools in any way, especially to the Board of School Commissioners and to every employee of this Department, I extend my sincere thanks and appreciation.

*Respectfully submitted,*

LYMAN C. HUNT,  
*Superintendent of Schools.*

REPORT OF THE  
**STREET COMMISSIONERS**

*To the Honorable City Council:*

MESSRS:—The board of Street Commissioners submit their Report for the calender year ended December 31, 1932.

REVENUES

Balance, January 1, 1932:

Streets Account .....	\$ 6,397.31	
Permanent Street Construction, 1931		
Bond Issue .....	76.83	
	<hr/>	\$ 6,474.14

Received from Appropriations as follows:

Streets .....	\$ 52,625.00	
Sidewalks, Curbs, and Gutters .....	10,000.00	
Sewers .....	7,000.00	
Sprinkling .....	5,400.00	
Snow Removal .....	5,000.00	
Street Painting and Signs .....	750.00	
Bridges .....	500.00	
State Aid from City .....	1,500.00	
	<hr/>	\$ 82,775.00

Received from State of Vermont:

State Aid .....	\$ 5,640.50	
Partial Refund, State Highway Tax . . . .	637.94	
State Aid for Snow Removal .....	148.50	
	<hr/>	\$ 6,426.94

Received from Assessments:

Sidewalks, Curbs and Gutters .....	\$ 6,353.75	
Streets .....	1,128.83	
Sewers .....	287.93	
	<hr/>	\$ 7,770.51

Received from Sale of Bonds:

Trunk Line Sewer, Maple Street .....	\$ 127,766.70	
Permanent Street Construction .....	50,000.00	
	<hr/>	\$ 177,766.70

Received from labor and Materials Account..	\$ 54,332.71
Received from Burlington Rapid Transit Co..	1,210.00
Received from fire insurance for damages to asphalt plant .....	1,196.79
Received from property owners on account of snow removal from sidewalks .....	501.13
Refunds on material and labor .....	357.07
Overexpended:	
Trunk Line Sewer .....	\$ 9,815.37
Snow removal .....	3,586.52
Street signs and Painting .....	200.62
	<hr/> \$ 13,602.51
Balance uncollected from Snow Removal on Sidewalks .....	6,093.61
	<hr/> \$ 358,507.11

## EXPENDITURES

## Warrants Drawn for Labor and Material as follows:

Trunk Line Sewer .....	\$ 131,134.71
Streets .....	104,959.92
Permanent Street Construction .....	30,340.77
Sidewalks, Curbs and Gutters .....	14,783.02
Snow Removal .....	7,009.54
Sewers .....	6,501.45
Sprinkling .....	5,583.78
Snow Removal on Sidewalks .....	1,760.97
Street Signs and Painting .....	950.62
Bridges .....	205.59
	<hr/> \$ 303,230.37
Transfers to Streets account from various ap- propriations for labor and materials .....	34,363.39
Transfers to Trunk Line Sewer account from various appropriations for labor and materials .....	8,196.02
Transfers to Sprinkling account from various appropriations for labor and material .....	450.00
Appropriations etc. closed as follows:	
Permanent Street Construction .....	\$ 5,680.39
Bridges .....	294.41
Sidewalks, Curbs, and Gutters .....	26.73
Sewers .....	19.33

---

Sprinkling.....	6.13	
		\$ 6,026.99
Balance expended in 1930 and 1931 for Snow		
Removal on Sidewalks.....		4,833.77
Appropriations open as follows:		
Streets.....		1,406.57
		<hr/>
		\$ 358,507.11

# REPORT OF THE SUPERINTENDENT OF STREETS

*To the Honorable Board of Street Commissioners of the City of Burlington,  
Vermont:*

GENTLEMEN:—The following is the report of the Superintendent  
of Streets for the year ended December 31, 1932.

## RECEIPTS AND EXPENDITURES OF THE SEVERAL APPROPRIATIONS

STREETS	
Unexpended balance, January 1, 1932.....	\$ 6,397.31
Appropriation.....	52,625.00
State of Vermont:	
State Aid.....	5,640.50
5% Refund.....	637.94
State Aid matched by City.....	1,500.00
Burlington Rapid Transit Co. for removing rails and resurfacing South Union Street..	1,210.00
Assessments—Shelburne Street.....	1,128.83
Received from insurance for fire damage at asphalt plant.....	1,196.79
Received from labor and materials account..	43,238.06
Warrants Drawn.....	104,959.92
Equipment and Materials taken over from Trunk Line Sewer for sale or general use	7,207.94
Unexpended Balance.....	1,406.57
	<hr/>
	\$ 113,574.43 \$ 113,574.43

SEWERS	
Appropriation.....	\$ 7,000.00
Received from Assessments.....	287.93
Received from labor and materials account..	32.53
Transferred to Streets account for labor and material.....	701.18
Transferred to Trunk Line Sewer Account for labor and material.....	98.50
Warrants Drawn.....	6,501.45
Unexpended Balance.....	19.33
	<hr/>
	\$ 7,320.46 \$ 7,320.46

## SNOW REMOVAL

Appropriation.....	\$	5,000.00		
Received from State of Vermont.....		148.50		
Overexpended.....		3,586.52		
Transferred to Streets Account for labor and materials, use of trucks, teams, etc.....				1,725.48

Warrants Drawn.....			131,134.71
Overexpended.....		9,815.37	
	\$	145,979.36	\$ 145,979.36

## SNOW REMOVAL ON SIDEWALKS—SPECIAL

Balance expended in 1930 and 1931.....	\$	4,833.77	
Collected from property owners in 1932.....		501.13	
Warrants drawn.....			1,760.97
Uncollected balance.....		6,093.61	
	\$	6,594.74	\$ 6,594.74

Audited and Found Correct,  
January 12, 1933,  
Francis C. Derby Co.

From the above financial statement, it will be noted that the total expenditures of all branches of this Department amounted to more than \$350,000.00, which is the largest amount ever expended by this Department in the history of the City, exceeding the expenditures of 1931 by approximately \$50,000.00. This was largely occasioned by the construction of the new Trunk Line Sewer for which the City authorized the sale of \$135,000.00 in bonds.

In the face of a general slowing up of industries and labor in other quarters, the Street Department has been called upon to take up this slack by doing more public works construction in order to give more employment to labor.

It is impossible to economize in the total amount of expenditures of this Department and at the same time give employment to men who are now out of employment, however, the economy of such expenditures comes in the fact that a dollar will go farther now in public works construction than it did in former years when wages and materials were higher. It is not the amount of money that is expended that counts, but the amount of construction work accomplished with that money which proves the economy of the job.

Each branch of our Department shows a small balance with the exception of Snow Removal, Trunk Line Sewer and Street Signs.

The overexpenditure of the appropriation in Snow Removal account was occasioned by not providing sufficient funds in the Budget in July, as had already been expended up to that time in the current year.

The overdraft in the appropriation for Street Signs and Painting, was occasioned by the passing of an ordinance which required the purchase and erection of several street signs after our appropriation had already been expended.

The overdraft in the Trunk Line Sewer appropriation was caused primarily by the sale of the Bonds which were sold much under par and was further occasioned by the use of considerable more hand labor and unskilled labor on this project than was originally intended when the estimate was made.

The balance in Bond Issue Street Paving account of \$5,680.39 was due to the reduced cost of labor and materials for the current year. This money will go into the Sinking Fund and help to pay off the bonds as they come due.

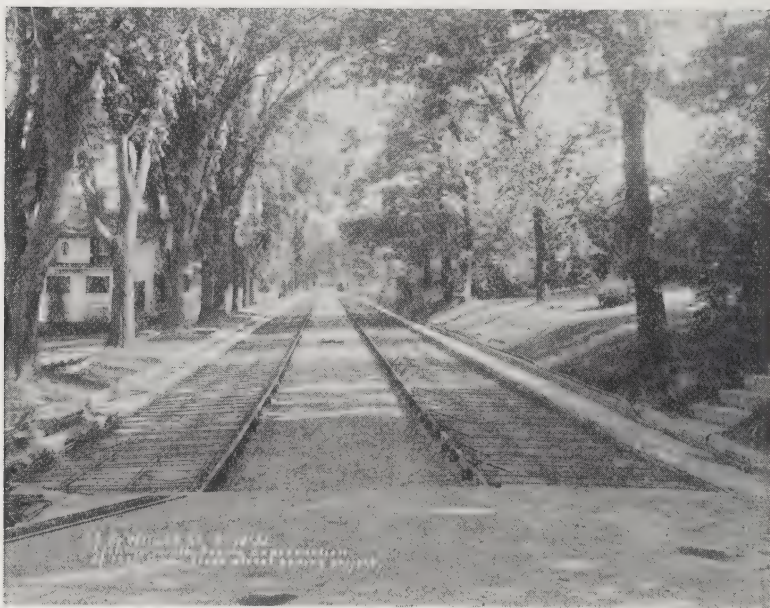

When we consider the large amount of work which has been given to those out of employment, it is gratifying to know that, except for the items mentioned, we have kept within the appropriations given to us for the current year.

STREETS  
BOND ISSUE STREET CONSTRUCTION

(1) *South Willard Street.*

This project was started at the junction of Bayview Street where Bond Issue Construction ended in 1930, and continued southerly to the junction of Shelburne Street. The total area in this job was 5,207 square yards. The total cost of the job was \$14,011.28, making an average unit cost per square yard of pavement of \$2.71. The above cost includes the pavement only, but does not include the work of removing old curbs and constructing new gutters which was done late in the season of 1931, and was in last year's report

Because of the peculiar sub-surface conditions on this project, namely the rock excavation for the sewer which was constructed two years ago, the clay sub-soil and the presence of springs, and a consid-

No. 1. *So. Willard St. Bond Issue Project during construction. Looking North from the intersection of Ledge Road. Note the heavy double steel mat reinforcement used in constructing Concrete Base.*

erable amount of ground water seepage, it seemed advisable to increase the thickness of the concrete base to 7 inches and to put in heavy double mat reinforcement. This is the first job of this type that we have included steel reinforcing rods in the base construction. I believe the extra expense was well warranted and will pay for itself several times over by longer life and less maintenance for this street receives much heavy traffic and is on U. S. Route No. 7.

The sand used for the Asphalt Wearing Surface on this job was partly from the Intervale and partly from the Sand Dunes. The peculiar crystalline formation of the sand obtained from the Sand Dunes, and the absence of any loam or slit made this sand much more economical to dry at the Asphalt Plant and speeded up our Plant production, which in turn, speeded up the number of square yards laid per day and consequently cut our unit cost considerably. From our experience with this

No. 2. So. Willard St. Bond Issue Project after completion of construction. Looking North from intersection of Ledge Road. 7" Reinforced concrete base, 2" Asphalt Wearing Surface, 30" Concrete Gutters.

sand on this job, we determined to use it for the rest of our work for this year.

A more detailed account of the costs on this job will be found in table "A" of this report.

(2) *North Winooski Avenue.*

This project began at North Street where a former project ended and continued northerly to Riverside Avenue.

The type of construction on this project was the same as that for South Willard Street, the concrete base being 7 inches in thickness, and one layer of reinforcing mats only was used instead of the double mat system used on Willard Street. The sub-soil conditions here being much more satisfactory than on Willard Street as it is practically all of a sand or gravel nature and well drained. Because of the heavy traffic and the fact that it is also on U. S. Route No. 7, it seemed advisable to

No. 3. *North Winooski Ave. Bond Issue Project during construction. Looking South from intersection of Riverside Avenue. Note the single steel mat reinforcement.*

use this reinforcement. The total area in this job was 10,174 square yards. The total cost of the pavement complete, not including work on gutters, was \$22,134.08, making an average unit cost of \$2.17 per square yard. This unit cost includes the excavation and preparation of base, the 7 inch concrete base and 2 inch Asphalt Wearing Surface.

A more detailed cost of this job, including the cost of gutters, will be found in table "A" of this report.

These two projects completed the Bond Issue Program which was started in 1929 and provided for \$50,000.00 per year for a period of 4 years. Due to the drop in price of construction materials, also in labor and using more modern methods of construction, we have been able to construct, in some cases, a higher type of pavement than was originally designed and complete our program with a balance on hand of approximately \$6,000.00, which will be turned back into the Sinking Fund for paying interest or retiring bonds as they become due.

No. 4. No. Winooski Ave. Bond Issue Project after completion of construction. Looking South from intersection of Riverside Ave. 7" reinforced concrete base, 2" asphalt top, 30" concrete gutters.

## GENERAL PAVEMENT CONSTRUCTION

The following pavement construction work was paid for out of our General Street Construction Funds, including such funds as are available from the State Highway Department for State Aid Construction and Maintenance, some of which is matched by the City in addition to our regular 20 percent State Funds.

A tabulated list of these streets, including their costs, will be found in Table "B."

(1) *Colchester Avenue: from University Place easterly.*

This project had only a small area and included the southerly side of the street where the pavement was widened from the old electric

No. 9. *Shelburne Street Widening Project during construction. Looking North from Ravine. Note newly constructed concrete integral curb and gutter and approximately 12' dirt shoulder where pavement is to be constructed.*

car tracks to the new concrete integral curbing and gutters and only extended as far as the easterly side of the intersection of Mansfield Avenue. There was a total of 393 square yards in this area which was constructed with a Telford Stone Base and a Hot-Mix Binder and Wearing Surface.

(2) *Shelburne Street: from St. Paul Street southerly to the Ravine.*

This project is a portion of the general project of widening Shelburne Street and included the construction of an integral concrete curbing and gutter on the westerly side of Shelburne Street from the intersection of St. Paul Street southerly to the Ravine near the Henry Bacon residence. It also included the construction of a pavement from the shoulder of the old pavement to the new concrete gutters, a width which averaged

No. 10. *Shelburne Street Widening Project after completion. Looking North from Ravine. Note widened section of completed pavement. Note 1½" exposed edge of concrete gutter allowed for future surfacing of entire street with asphalt wearing surface.*

nearly 12 feet and which included the area previously occupied by the tracks of the old electric car line. The section from St. Paul Street to a point opposite Ledge Road was found to have sufficient good gravel and crushed stone to be used as a base on which we constructed a Hot-Mix Asphalt Pavement consisting of 2 inches of Binder Course and 2 inches of Stone-Filled-Sheet Asphalt Wearing Course. This section of the job also included the intersection of the newly developed street near the intersection of South Union Street named Marion Street. The remainder of the job, from Ledge Road to the Ravine, was constructed with a 10 inch Telford Stone Base, the stone being obtained as salvage from the old cobble stone gutter from South Willard Street and North Winooski Avenue Bond Issue Jobs, and some from the City Quarry. A thin layer of coarse crushed stone was spread over the Telford Base and thoroughly rolled after which it was given a Penetration of approximately  $1\frac{1}{4}$  gallons per square yard of 51-60 Penetration Asphalt with our Asphalt Distributor. This base was again rolled and a 2 inch layer of Hot-Mix Asphalt Binder was constructed over this base and feathered out on the shoulder of the old penetration macadam. The surface was finished approximately  $1\frac{1}{2}$  inches below the surface of the concrete gutters to allow for the construction of a Hot-Mix Asphalt Wearing Course at a later date. The total area in this project was 3,850 square yards. The total length being 2,885 lineal feet.

(3) *Scarff Avenue: from Shelburne Street to Wells Street.*

This project has been done under the "Stage Construction" plan, having constructed the sidewalk, curbing and gutters and stone base during the past 2 or 3 years and surfacing with salvaged macadam. This year we completed the pavement by constructing a "Class B" Penetration Macadam using special No. 6 Mixed-In-Place Asphalt for a Binder and  $\frac{3}{4}$  inch Peastone for aggregate, applying the first application to the old surface and then building up with two successive layers of peastone approximately  $\frac{3}{4}$  of an inch in thickness each. We then covered the whole surface with a thin coating of concrete sand. This has made a very serviceable wearing surface which is durable and non-skid and very reasonable in cost. The area in this project was 1,342 square yards.

(4) *DeForest Road: from South Willard Street to Overlake Park.*

This street was recently developed and deeded to the City, including a large amount of broken stone which was excavated during the laying out and development of the street about 3 years ago. In order to use the large number of unemployed laborers, who were receiving help from

the Charity Department, it was decided that each man receiving help should give one day's work per week to the City in payment of the assistance given him, for which he would receive no additional compensation. These men were used primarily on projects for which the City had no special funds for development and which under ordinary conditions the City would be unable to construct. Deforest Road was the first project attempted under this system. All work was done with hand labor, the excavated materials being loaded by hand shovels into wheelbarrows and dumped over the lower side of the street to form a dirt shoulder. The large rubble stone which had been previously excavated and piled along the edge of the street was broken up into useable sizes, loaded into wheelbarrows and carted on to the street where it was placed by hand in constructing a Telford Stone Base approximately 10 inches in thickness. After this base had been placed and rolled, approximately 6 inches of salvaged macadam obtained from the South Willard Street Bond Issue Job and the North Winooski Avenue Bond Issue Job, was spread over the entire pavement surface and rolled with the 14 ton Steam Roller. This surface was treated with Calcium Chloride. This made a very durable base which will be used as a temporary pavement and on which, at a later date, will be constructed some type of Non-Skid Asphalt Wearing Surface, as the grade on this street is very steep. The total area in this project was 3,520 square yards.

(5) *South Union Street: from Howard Street to St. Paul Street.*

This project included only the track area of the old Burlington Traction Company. The old rails were removed, but the ties which were embedded in concrete base were left in. The gutters caused by removing the rails and brick liners on each side of the rails were first filled with crushed stone and penetrated with 51-60 Penetration Asphalt which had been cut-back by using about 20 percent of heavy Asphaltic Base Fuel Oil. This application being applied by hand nozzle from our pressure distributor. A leveling course of Stone-Filled-Sheet Asphalt was then placed over the old track area and a final wearing surface completed the pavement. The shoulders were feathered out on the old surface to eliminate as far as possible the depression which would otherwise be formed at the junction of the old pavement and the track area section. 744 square yards of this pavement was constructed and in addition to this, a small amount of resurfacing was constructed north of Howard Street where the previous year's work, which was done in cold weather, needed repairs.

(6) *Maple Street: from Church Street westerly.*

This project includes only intersections on Maple Street from Church Street to Battery Street inclusive. These intersections had been previously torn up during the construction of the new Trunk Line Sewer and as each intersection receives comparatively heavy traffic, it seemed best to construct a new pavement at each intersection, leaving the remainder of the block for future surfacing. Each of these intersections which had previously been back-filled with good salvaged material anticipating the early construction of a new surface, were surfaced with 2 layers of Hot-Mix Asphalt consisting of 2 inches of Binder and 2 inches of top. The total area in all of these intersections was 1,700 square yards.

(7) *Right-Of-Way to Water and Electric Light Plants from Lake Street westerly.*

This job was a Penetration Asphalt Type of construction and included a 20 foot pavement across the Central Vermont Railway yards from the junction of Lake Street and Depot Street toward the plants of the Water and Electric Light Departments. This job was constructed at the request of the Electric Light and Water Departments at the expense of these two Departments and the Oil Companies using this crossing to get to and from their plants. The job consisted of two separate courses of Penetration Macadam 4 inches in thickness extending from the top of the rails down to and enveloping a portion of the ties. The excavation and considerable of the hand work on this job was done with the regular section gang of the Central Vermont Railroad who installed new ties where necessary and new guard rails on the inside of each track. The total area constructed was 513 square yards.

(8) *Staniford Road: from North Avenue westerly.*

This project included grading work only and was accomplished with the same type of labor as mentioned under Deforest Road. A new grade was established for the Road which would allow the street to grade from North Avenue westerly to the railway tracks and eliminate the drainage trouble which has always existed. After the grading was completed the street surface was treated with Calcium Chloride and 4 dummy catch basins were constructed to assist in draining the flat sections. The surface of this street is a fine grade of sand and gravel. The area regraded included approximately 5,555 square yards. This street should receive a more substantial type of surface treatment another year.

(9) *University Terrace: from Main Street southerly.*

This street was recently accepted by the City, all construction work except the pavement having been completed. The street was originally surfaced with cinders, but had received no treatment except a very light application of Road Oil in 1931. The entire surface of the street was scarrified, reshaped and rolled and a short section on the southerly end of the street was excavated and rebuilt with salvaged stonechips from the Rock Quarry. This surface was given a heavy application of No. 6 Asphaltic Road Oil to which had been added about 10 percent of 51-60 Penetration Asphalt. The surface was then given a heavy application of concrete sand and opened to traffic. This could only be classed as a surface treated job, but as it is a dead-end street with no heavy traffic, it will be very satisfactory. The total area on this project was 1,590 square yards.

#### MAINTENANCE

Several projects which do not rightfully belong in the construction class, but on which considerable work was done of a maintenance nature are as follows.

(1) *Main Street: from South Union Street Easterly.*

This section of Main Street has given considerable trouble for several years while the frost is coming out of the ground, but as there has been no money to repave this street, it seemed best to do a temporary maintenance job this year, therefore, the old surface was scarrified, reshaped and rolled and covered with a thin layer of  $\frac{3}{4}$  inch stone after which two alternate treatments of approximately  $\frac{1}{2}$  gallon per square yard of No. 6 Mixed-In-Place Asphalt was applied and the Mixed-In-Place method was used to complete the job after which a thin coating of concrete sand was spread over the entire surface. The area so treated was 2,389 square yards.

(2) *South Prospect Street: from south end of sidewalk, curbing and gutter in front of Professor Jordan's residence, southerly.*

This project was only a surface treatment job, but was given a little more attention than the ordinary surface treatment job where the surface is in fair condition. This job which extended from the south end of the present Asphalt Pavement in front of Professor Jordan's residence, southerly to a point opposite the south entrance gate to the Julian Clark property, has given considerable trouble from frost action during previous years and has never been built up to carry heavy traffic, there-

fore, the entire surface was scarrified, reshaped and rolled and an application of heavy No. 6 Road Oil was given to the old surface material at a rate of approximately  $\frac{1}{2}$  gallon per square yard. A layer of  $\frac{3}{4}$  inch stone was then spread at a depth of approximately 1 inch and a second application was given of the same material at the rate of approximately 6-10 gallon per square yard. This surface was then given a light cover of concrete sand and the surface was rolled with a 14 ton steam roller. Traffic was allowed through the job during the entire process by completing  $\frac{1}{2}$  of the surface at a time. This is not a permanent job by any means and is only constructed as a temporary surface treatment which will carry the traffic until it becomes necessary and feasible to construct a more durable pavement.

(3) *Ledge Road: from Shelburne Street easterly to Prospect Street, (2,000 Square Yards.)*

Ledge Road for several years has been dangerous for traffic when the surface was wet and although no serious accidents had happened, it was necessary to have signs warning the public of this condition and several minor accidents have happened each year. It seemed advisable to construct a Non-Skid Surface and thus prevent the possibility of a serious accident. We selected a material called "Bitumuls," which is an Emulsified Asphalt, for treating the surface and applied this material at the rate of 3-10 gallons per square yard, following this application immediately with a light cover of  $\frac{3}{4}$  inch stone and immediately rolling this stone with a 10 ton tandem roller so as to lock the stone chips into the Asphalt Emulsion before the setting up process had taken place. Only one load of "Bitumuls" was used on this job and the entire job was completed in less than one-half day, at a very reasonable cost. The job has now been completed more than 4 months and has been subjected to the open season during the winter and is still in excellent condition, which proves the worth of this type of surface treatment. The area of this job was approximately 3,424 square yards.

(4) *Shelburne Street: from Lyman Avenue to Potash Brook Bridge.*

Several accidents had happened on this particular section of Shelburne street during the early part of the summer and it was evident that something would have to be done besides erecting signs to prevent these accidents, therefore, from our experience with the Non-Skid Surface Treatment on Ledge Road, which had been constructed a few weeks previous, it was decided to give Shelburne Road the same treatment. The application, however, was increased on this job, because of the heavier traffic. The same methods were used throughout with the same results

except that the heavier treatment, of course, provided a more durable Non-Skid surface and up to the present time I do not know of an accident having happened on this section of Shelburne Street since the Non-Skid surface was constructed. The area of this job was approximately 4,000 square yards.

(5) *Hoover Street: from Shelburne Street to Perotta Place.*

This street which is only one block in length never had been completely graded, therefore, while we were working on Shelburne Street widening project and had our equipment handy, we completed the grading on this street to conform to the proposed grade and surface treated the travel portion of the street with approximately 1 inch of  $\frac{3}{4}$  inch stone chips and Quarry waste. This material will be used to good advantage in surface treating this street next year. The total area was 667 square yards.

(6) *Cliff Street: from Willard Street to Summit Street.*

This block of Cliff Street has always given more or less trouble because of its steep grade and clay soil, no surface material ever having been applied. The grade was cut down somewhat and the ditches and shoulders excavated and reshaped removing several small trees and several large boulders, also cleaning the brush and undergrowth for the entire width of the street. The surface was then covered with approximately 6 inches of salvaged macadam and gravel taken from the excavation from the Bond Issue Job on North Winooski Avenue. This surface was machined to a true grade and cross-section and rolled with the 10 ton tandem roller after which a thin layer of  $\frac{3}{4}$  inch stone chips was spread over the entire area and was given an application of Calcium Chloride. The area of this project was approximately 2,200 square yards.

(7) *Adams Court: from Shelburne Street easterly.*

This is not an accepted street, but under the rulings of the Board of Street Commissioners the Street Department is allowed to do a small amount of work of a maintenance nature on such streets providing the property owners pay for one-half of the cost. Under this ruling we completed the grading on the northerly side of Adams Court and surfaced the traveled portion of the street with salvaged macadam from South Willard Street Bond Issue Job. Over this macadam we also spread a thin coating of  $\frac{3}{4}$  inch stone chips and treated the surface with Calcium Chloride. The excavated material from this job was given to the Park

Department for use in grading a parking area on the City property near the upper end of Ledge Road. The property owners agreed to pay one-half of the cost of this improvement, not to exceed \$50.00 and the same has already been paid. The total area of this project was 788 square yards.

(8) *North Avenue: from Starr Farm Road northerly.*

This section of North Avenue has for many years given us trouble in the early spring months while the ground was still frozen and the early spring thaws flooded the road sometimes to a depth of nearly 2 feet, therefore, while doing the grading job on Staniford Road, the excavated material which was mostly gravel and sand was used to build up this low section of North Avenue to an elevation which would prevent flooding. We also constructed "Dummy" Catch Basins on each side of the road at this low point to assist in draining this area. The section so reconstructed was approximately 600 feet in length and contained approximately 1,200 square yards in area.

(9) The shoulders of the fills on North Avenue near the Arm's Farm and opposite Lake view Cemetery were widened during the month of December when all other work was practically completed. A total of 6,800 yards of filling was taken from the borrow pit on the Arm's Farm and used to widen these fills. The labor was furnished by the Charity Department and the fills are now completed and will be surfaced with a sidewalk, or sidewalk replaced where it had to be removed to do this work, sometime next spring.

(10) Culverts were put in on the following locations to assist in draining the roads:

1 Corrugated Culvert on North Avenue on Arthur Farm (now owned by the City) opposite Lakeview Cemetery leading onto the Intervale.

1 Corrugated Culvert on North Avenue south of Staniford Road.

3 Corrugated Metal Culverts on Spear Street, replacing old tile culverts.

1 Corrugated Metal Culvert on Bradley Road at Ravine on the Howe Farm.

# C ITEMS OF CONSTRUCTION WHICH DO NOT APPEAR IN LEGEND AS COMPLETED STREETS

## SPRINKLING

*Oiling*—This is the second season that the Street Department has done all of its own oiling with its own equipment. The appropriation for oiling this year was cut down approximately 10 percent from last year, but we were able to surface treat as many streets as we did the previous year by cutting down the amount of applications per square yard. We also did several new jobs which had never been oiled before. The method of handling the oiling with our own equipment and labor has worked out very satisfactory and to good advantage to the City in several different ways. The equipment is always available for any special jobs of this nature at any time during the season and with our storage tank for Road Oils, we are able to keep a supply on hand for this work. The equipment has more than paid for itself during the two seasons it has been used.

## BRIDGES

No construction work on bridges was necessary during the past year, but considerable maintenance work was done in replacing broken planks, guard rails, etc., and in maintaining the steel expansion plates on the New Winooski Bridge. We also, as a maintenance job, surfaced the plank flooring on two of our small bridges with a 2 inch layer of Asphalt mixtures. These bridges were the small bridge across the Potash Brook leading to Queen City Park and the small bridge on Grove Street.

The painting of the Winooski Bridge was again considered, but owing to shortage in funds for this work, it was thought best to delay this work until next year. This work should be done, however, in order to prevent any deterioration in the steel portion of the structure.

## SIDEWALK, CURBING AND GUTTER

*Construction*—Fourteen separate sidewalk, curbing and gutter jobs were constructed during the past year by the Department. Several private jobs were done on various streets where the property owners did not wish to wait for their turn under the regular program of the City. A total of 14,644 lineal feet of concrete sidewalks, 9,288 lineal feet of integral curbing and gutters, 150 lineal feet of single concrete curbing, and 8,194 lineal feet of single concrete gutters were constructed under this program. A complete list of all sidewalk, curbing and gutters constructed during the year will be found in Table "H" of this report. The thirty inch gutters constructed as a part of the Bond Issue projects were paid for from that fund.

## H. SIDEWALK, CURB AND GUTTER CONSTRUCTION, 1932

Street and Location	Lineal feet of sidewalk	Lineal feet of curbing	Lineal feet of gutter

Private Work—Various Locations. ....	3,038	2,893	2,713
Totals. ....	14,644	9,288	17,327

*Maintenance*—The maintenance work on sidewalk, curbing and gutters this year was very light. Such sections of sidewalks as were called to the attention of the Department by abutting property owners because of their uneven condition were regraded. A large amount of this work was done the previous year which made the work lighter this year. There are, however, several streets that need considerable maintenance work done on them and which would cost very little to put in good shape. A certain portion of the appropriation each year should be set aside for this work.

#### STREET PAINTING AND SIGNS

The painting of parking areas and cross-walks and other street signs and the erection of traffic signs has been carried on by this Department as usual under the direction of the Police Department. Several new signs have been erected and the State has furnished several signs for State Routes which have not been erected because of shortage of funds, but will be erected after the first of the year when money is available from our next year's appropriation. Large signs with crystal buttons have been erected at the City Limits on each State Road entering the City, designating the "Speed Limit" requirements to be observed within the City.

#### STONE QUARRY

The total number of tons of stone quarried and crushed at the City Rock Quarry this year was 17,047 tons. This is nearly as large an output as 1931. This brings the total output of the Quarry, for the 10 year's period during which it has operated, to 147,973 tons or an average of 14,797 tons per year. The average unit cost over this period of years is \$1.477 per ton. Our average unit cost for this year is \$1.322 per ton.

Due to the action of the Board of Aldermen in prohibiting the City from selling stone to the public, the amount of stone sold for private purposes this year has been very small and consequently the amount of labor which the City could supply in preparing the stone has also been limited. The Quarry is not being operated during the winter months except for repair work to the equipment and buildings and breaking stone for use next season. This work is being done principally with Charity labor.

#### SNOW REMOVAL

We had considerable work in the removal of snow during the period from January to April, but had very little work in the early part of this

winter for the months of November and December. The appropriation for this work, which was made in July when the budget was voted, was cut to \$5,000.00 which is approximately \$3,700.00 less than the amount which had already been expended up to that time, therefore, the Department shows an overdraft although no money has been expended from this appropriation since the budget was voted.

The work of removing snow from the streets has become really an item of winter maintenance and should be so considered when appropriating money for this work, just as much as the actual maintenance of the street surfaces in summer, for without the proper removal of snow, it is impossible to get the full advantage of the use of the streets both summer and winter. Money appropriated for the removal of snow from the streets and highways, if properly administered, will bring just as much returns to the average citizen and probably more to industry than the same amount of money expended in the maintenance of those same streets and highways during the summer months.

#### MISCELLANEOUS

A considerable number of small construction and maintenance jobs have been done for the various Departments as a matter of cooperating with these Departments in doing work which was out of the line of the regular work of those Departments and which was in our regular line of work, each Department being billed for its proportionate share of the cost.

#### PLANT AND EQUIPMENT

No new equipment has been purchased during the past year except those items such as boilers, pumps, steel sheet piling, etc. These pieces of equipment were purchased primarily for use on the Trunk Line Sewer project and were taken over by the Street Department into its general equipment. Some of these items of equipment will be disposed of as soon as possible. All equipment has been properly maintained so as to keep it in first class condition.

The lot on Pine Street purchased for the Street Department has been partially developed by constructing new sidewalk, curbing and gutters on the Pine Street frontage, clearing away all brush, filling with salvage material taken from the construction jobs to a depth of one foot or more for nearly the entire area, raising the railway track, constructing driveways with salvaged materials around the northerly and easterly sides of the area for permanent drives.

Improvements have been made around the crushing and batcher

plants at the Stone Quarry where permanent driveway ramps have replaced the old temporary plank drives. Underground drains have also been installed between the crusher and batcher plants to drain off the Quarry pit. A deep well has also been drilled with our regular Quarry drills to furnish drinking water for the men.

A team has been purchased from U. A. Woodbury for the use of the Department.

#### CONCLUSION

In conclusion, I would say that the work of the Street Department shows an increase over that of last year, which is mainly due to the extra work made necessary by the Trunk Line Sewer construction and the unemployment relief work. This has been very satisfactory, however, and the Department has cooperated with the Charity Department in trying to give as much employment as possible to those receiving assistance from that Department.

Although no public works department is ever free from criticism, whether justly or unjustly given, I feel that the small amount of criticism which has come to my attention during the past year speaks well for the way in which the work has been conducted and I feel that due credit should be given all employees of the Department who have rendered satisfactory services and assisted so materially in trying to give satisfaction to the general public while executing their work. I wish, also, to extend my appreciation for the cooperation and support given me by all City Officials and Citizens of Burlington in helping me to carry out the duties of my office to the best interest of the City generally.

*Respectfully submitted,*

GEO. C. STANLEY,  
*Superintendent of Streets,*

## REPORT OF THE CITY ENGINEER

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—I hereby submit my report as City Engineer for the year ended December 31, 1932.

### SURVEYS

Street monuments have been set on several new locations including the boundary corners of the new Street Department lot on Pine Street which was purchased from the T. A. Haigh Lumber Company.

All requests for surveys or engineering work from City Departments have been properly rendered. A survey for additional land acquired by the School Department at the H. O. Wheeler School was made including the placing of new monuments at the corners of the new addition.

A complete survey was made of the northerly section of the City, including all of the area between the Winooski River and Lake Champlain, lying northerly of the Central Vermont Railroad which passes through the tunnel on North Avenue. This section of the City includes about 3,600 acres. From this survey, a complete map was made showing the City boundary as defined by the Winooski River from the Central Vermont Railroad bridge to Lake Champlain, also the low water mark of Lake Champlain from the mouth of the Winooski River to the City Water Department pumping station and filter plant. This map also shows the topography of this area such as streets, buildings, streams, etc., and the elevations of the area represented in contours sketched at 5 foot intervals. This survey was started primarily for obtaining information to be used in making a study of the drainage area which will eventually be developed into City streets and for determining a proper sewer system for this area. The City never has had a topographical or contour map of this area, therefore, the map was very much needed for general use in the City Engineer's Office and I feel that we were very fortunate in being able to get this map made at this time, and at a very reasonable expense. A tracing has been made of this map which will enable us to get blueprint copies or photostat copies as we may desire. An electrotype plate should be made from the tracing at a reduced scale from which we could make reproductions by printing at any time.

All requests for street lines and grades from people erecting new buildings or grading their lots have been given in a proper manner.

## DESIGNS

Designs for all street construction, including pavements, sidewalk, curbing and gutter, also for sewers and culverts, have been completed and placed on file for each and every job constructed by the Street Department during the year.

A special design for the extension of the old stone culvert on Shelburne Street, using reinforced concrete, was completed very recently and was approved by the State Highway Department for construction under the State Aid Bridge Fund. This design also included the widening of the pavement at this point by constructing a new fill on the westerly side of the street to the street line and completing the street improvement by the construction of a concrete integral curb and gutter and concrete sidewalk, also the widening of the asphalt pavement for approximately 12 feet. This work will be constructed during the month of January.

A special design was also made for the overflow sewer job at the junction of North Bend Street and North Champlain Street leading down into the intervalle.

## INSPECTION

The City Engineer's Office is responsible for the inspection of all street cuts whether made by any City Department, Individual or Public Service Corporation. This work has been done in a proper manner including the inspection and final measurements of the pavement. The cost of such work and inspection has been billed to the party or parties responsible for such cuts and records have been filed for each and every cut. The total number of permits issued during the year was 163. A list of the permits issued during the past year will be found in Table "A."

—A—

## PERMITS ISSUED 1932

Number of permits for new gas services .....	28
Number of permits for repairs to gas mains and services.....	28
Number of permits for new water services .....	16
Number of permits for repairs to water mains and services.....	19
Number of permits for repairs to sewer mains and services.....	17
Number of permits for sewer connections.....	29
Number of permits for new gas, water and sewer mains .....	14
Number of permits for electrical conduits, etc.....	9
Number of permits for miscellaneous work .....	3
Total Number of Permits Issued .....	163

## SIDEWALK, CURBING AND GUTTER CONSTRUCTION

Our appropriation for Sidewalk, Curbing and Gutter construction during the past year allowed for about the same amount of work as usual, therefore, the engineering work of preparing plans, setting stakes for lines and grades, and checking construction work in the field has required about the same amount of work as usual. The total amount of concrete sidewalks constructed during the year amounted to approximately 2.8 miles. The total amount of concrete curbing constructed was approximately 1.8 miles. The total amount of concrete gutter constructed amounted to approximately 3.3 miles. A tabulated list of the separate jobs will be found in Table "H" of the Report of the Superintendent of Streets.

## MISCELLANEOUS CONSTRUCTION

In order that we may have the information available in the Engineer's Office regarding the amount of construction of various kinds which have been completed over a long period of years and which does not appear in any other form in the City Report, I have brought up to date all such information and have corrected for the additions or deductions for the current year's work. A list of this Miscellaneous Construction will be found in Table "B" of this report.

—B—

## MISCELLANEOUS CONSTRUCTION

Character of Work	Total in No. Miles
Length of Cement Walk.....	55.768
Length of Tar Concrete Walk.....	11.390
Length of Stone Flagging Walk.....	2.174
Length of Earth, Cinder or Gravel Walk Curbed with Stone	4.517
Length of Cement Curb.....	26.578
Length of Stone Curb.....	17.935
Length of Integral Curb and Gutter.....	10.344
Length of Cement Gutters.....	21.532
Number of Cement Crossings.....	27
Number of Tar-Concrete Crossings.....	76
Number of Stone Crossings.....	110
Number of Brick Crossings.....	17
Number of Sewer Connections Since 1887.....	3,018
Number of Catch Basins (Approx.).....	450

A glance at this table will disclose many interesting items. We have a total of approximately 70 miles of hard surfaced sidewalks of all types. We have approximately 55 miles of concrete and stone curbing and approximately 32 miles of concrete and stone gutters. When you consider that the City of Burlington has only approximately 61 miles of streets, the above figures show that a large percentage of our streets have been improved with Sidewalk, Curbing and Gutters, probably a much greater extent than most any other New England City of its size. These improvements add greatly to the beauty of our City and this work should be encouraged.

### SEWERS

The construction of our new Trunk Line Sewer on Maple Street, a detailed report of which I have already given in my Report as Superintendent of Streets, was the largest single project of the year and will probably be the largest single sewer project, so far as the size of the sewer is concerned, that the City of Burlington will ever be called upon to construct.

A study of the drainage and sewer system for the northerly portion of the City is now being given consideration. Recommendations, with estimates of probable costs, will be submitted to the Board of Aldermen very soon. This system will comprise the major part of the plateau area of the northerly section of the City between the Winooski River and Lake Champlain north of Lakeview Cemetery. No sewer system of any kind has been designed or proposed for this section up to this time. The total area of this section is approximately 3,600 acres. Several smaller sewer jobs have been constructed during the year which are listed in Table "C" of this Report. This table also includes a list of sewers which have been added to the City's System by reason of the acceptance of privately developed streets where the sewers have been constructed by private parties subject to the inspection and approval of the City Engineer. A total of 2,522 lineal feet of Vitrified Tile Sewer, 2,955 lineal feet of Concrete Sewer and 268 lineal feet of metal sewer, or a grand total of 5,745 lineal feet of all types of sewers have been constructed or added to the City System this year. This is equivalent to approximately 1.1 miles of sewers added to our system of sewers this year. The total length of all sewers now in use in the City of Burlington amounts to 38.48 miles. A list of all sewer construction to date and now in use in the City Sewer System will be found in Table "D."

## —C—

## SEWER CONSTRUCTION 1932

## BY THE CITY:

- (a) *Trunk Line Sewer.*
  - (a) Maple St.—Church St. to Battery St.,  
1,595 feet, 6 foot Monolithic Concrete.
  - (b) Maple St.—Battery St. to Lake,  
1,360 feet, 8' x 8.5', with 10¼ inch Tile Liner Plate invert,  
rectangular reinforced concrete.
- (b) *Hoover Street:*  
Shelburne Street easterly 250 feet,  
12 inch Vitrified Tile.
- (c) *North Champlain Street Overflow:*  
North Bend Street to Intervale,  
84 feet—24 inch Metal,  
184 feet—18 inch Metal.
- (d) *North Bend Street:*  
From dead-end west of Walnut Street westerly,  
50 feet—6 inch Vitrified Tile.

## BY PRIVATE PARTIES:

- (a) *University Terrace:*  
Main Street southerly, 614.5 feet,  
8 inch Vitrified Tile. (Deeded to City 1932).
- (b) *Robinson Court:*
  - (1) Extension of old line, 200 feet,  
8 inch Vitrified Tile.
  - (2) So. Prospect Street easterly, 200 feet,  
10 inch Vitrified Tile.
- (c) *Margaret Street:*  
Caroline St. to Ledgemere St., 272.5 feet,  
8 inch Vitrified Tile.
- (d) *Ledgemere Street:*  
Margaret Street to end, 514.5 feet,  
8 Inch Vitrified Tile.
- (e) *Marian Street:*  
Ledgemere Street easterly, 208.5 feet,  
6 inch Vitrified Tile.
- (f) *Hoover Street:*  
Ludwig Court easterly, 212 feet,  
10 inch Vitrified Tile.

## MAPS AND RECORDS

All Maps and Records of the Engineer's Office showing construction work of all types have been prepared by this office. Originals have been filed in the filing cabinet in the fire proof vault in the Office of the City Engineer and blue print copies have been filed in the steel plan file for daily use.

The construction map of the City of Burlington showing the different types of pavements on our City Streets has been brought up to date including the 1932 construction and a copy of this map appears as a part of this Report. A convenient legend giving a brief summary of the more important construction jobs completed during the year will be found on this map.

House Number Maps have been made for all newly developed and accepted streets.

---

BRIDGES

The inspection of all bridges and culverts within the City has been made by me and such repairs as was found necessary were immediately made following such inspections. Because of insufficient funds it was voted by the Board of Finance to postpone the painting of the steel portion of the Winooski Bridge which I recommended in my report of last year, until a later date. I trust that money will be made available during the coming year to paint this bridge as I feel it is very necessary and vitally important to the life of the Bridge and should not be neglected.

Plans for the extension of the Culvert on Shelburne Street have been made and construction work is expected to start very soon on this project. The smaller bridges and culverts are all in satisfactory condition. New asphalt wearing surfaces have been constructed on the flooring of Grove Street Bridge and on the Bridge on Queen City Park Road over Potash Brook.

## HOUSE NUMBERS

All house numbers have been issued for new houses and additions to old houses which have required new numbers. A total number of 61 notices have been sent out to property owners for new numbers.

## GLEBE LANDS

No work has been accomplished during the past year in connection with a final and permanent monumenting of Glebe Land areas because of shortage of funds, however, I would refer you to my recommendations in connection with this work which will be found in my Report of last year which I wish to be considered as my recommendation again at this time.

## BOND ISSUE STREET CONSTRUCTION

As usual I have reported in detail on the Bond Issue Street Construction work in my Report as Superintendent of Streets and will, therefore, refer you to that Report for such details. The engineering in connection with carrying out all Bond Issue Street Improvement construction has been done by the City Engineer's Office and all plans for the same have been filed for permanent record in the Office of the City Engineer.

## CONCLUSION

In reporting on the activities of the City Engineer's Office, I have endeavored to give as comprehensive a report as possible on all construction work without making the Report too cumbersome, but at the same time, I have endeavored to give enough facts and figures to make the Report of real value as a matter of record which may be used for future reference.

Considerable information and facts regarding comparative costs and progress along many lines may be very well presented by the use of graphs and it was my intention to use this system to a considerable extent in connection with my Report this year but, owing to the necessity for economy, I did not feel justified in going to the extra expense of preparing the office work and the engraving of plates which would be necessary to present such information in this report.

In submitting this Report, I wish to extend my appreciation to all City Officials and Citizens of Burlington for their cooperation in helping me to carry out to the best of my ability the duties of City Engineer during the past year.

*Respectfully submitted,*

GEO. C. STANLEY,  
*City Engineer.*

REPORT OF THE  
**CITY AUDITORS**

February 3, 1933

*To His Honor the Mayor and City Council of Burlington, Vermont:*

DEAR SIRs:—In compliance with directions given us by your Finance Committee, we have made an examination of the Books and Records of the several Departments of the City of Burlington for the year ended December 31, 1932 and we submit herewith our report thereon, comprising the Exhibits and Schedules indexed on the following page.

In exhibit C, we have shown an analysis of the General Fund Surplus which was decreased by \$1,951.03 during the year.

Warrants authorizing disbursements for all Departments were examined by us and found to be signed by the proper Officers.

[The General Fund Cash in Bank at December 31, 1932 was verified by a certificate from your depository, as was also the cash held for Trust Funds, Special Funds and Sinking Funds. Trust Fund Securities were verified by inspection and count.

Bonds retired and Bond Interest Coupons Paid, during the year, were inspected and found to be in order and properly cancelled.

*Respectfully submitted,*

FRANCIS C. DERBY COMPANY.

# REPORT OF THE VISITING NURSES' ASSOCIATION

## CHILD HEALTH WORK

*To the Honorable City Council of the City of Burlington:*

### VITAL STATISTICS 1932

Total Births .....	820
Still Births .....	27
Living Births .....	793
Resident Births .....	528
Non-Resident Births.....	292
Resident Births, V. N. A. Patients.....	371
Resident Births, not V. N. A. Patients.....	157
Still Births, V. N. A. Patients.....	7
Total Infant Deaths.....	60
Resident Infant Deaths .....	37
Resident Infant Deaths, V. N. A. Patients.....	23
Resident Infant Deaths, not V. N. A. Patients.....	13
Non-Resident Deaths.....	23

The Visiting Nurse Association gave advice or care to 70.2% of the resident births in 1932

Child Welfare Advisory Calls, Jan. 1—May 31.....	5,160
Infant Welfare Advisory Calls, June 1—Dec. 31.....	3,250
Pre-School Advisory Calls, June 1—Dec. 31.....	2,387
Total Child Health Calls .....	10,797
Pre-Natal Advisory Calls, total .....	2,771
Pre-Natal Advisory Calls, free .....	1,705
Not-at-home, Child Welfare and Pre-Natal Calls.....	905
Total Calls, Child Health Appropriation.....	13,407
Assisted at Confinements, total.....	145
Babies Weighed at Howard Relief .....	881

December 31, 1932 ended the eleventh year that the Child Welfare and Pre-Natal work of the Visiting Nurse Association has been subsidized by the City of Burlington. There can be little change in the general routine of work such as we are doing—the change being in the increase of the amount of work we are doing each year. We admitted to our Pre-

Natal Advisory Care 366 cases, one for each day of the year. During the year, three of those patients died following child-birth—one case being complicated by pneumonia, another by scarlet-fever, the third as a result of puerperal septicemia. We are now beginning to feel that our Pre-School work is really beginning to show up to some advantage as there has been a gain in the number of physical defects, as brought to the attention of the family by the nurse, that have been corrected. For the more defective tonsils and adenoids removed, the more eye and ear troubles corrected, the fewer the interruptions to the school routine once the child has been enrolled. We are carrying 554 children born since Jan. 1, 1930, under our Pre-School classification. Of the babies born in 1932, 120 are 15 pounds in weight and are seen, either every week or every other week, as the general condition indicates. The remainder are seen once a month. The death rate for Burlington unfortunately showed a rise this past year, being 75 per thousand births. The rate for resident births was 70 per thousand, 60 per thousand for those under our care and 86 per thousand for those not V. N. A. patients.

We assisted the City Physician at 23 home confinements with a total of 45½ hours, also giving the necessary after-care to both the mother and baby.

At present, we have a total of 801 families with a total of 935 individuals whom we are seeing every month. There were 170 different babies and pre-school children who attended the Well Baby Conference at the Howard Relief Building on Wednesday afternoons. Some idea of the scope of our work may be gained from the fact that the last census gives Burlington a population of 24,789, our total advisory calls for the year 13,407 representing calls to more than half the population of the city. But we earnestly hope that quantity does not mean a diminution of quality.

We wish to thank you for your support given to our Association and assure that we will continue to do our part to merit the confidence you place in us.

HELEN M. ARMSTRONG, R.N.  
*Executive Director.*

FORTY-FOURTH ANNUAL REPORT  
OF THE  
**WATER COMMISSIONERS**

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—The Board of Water Commissioners herewith submit their report for the year ending December 31, 1932.

The report of the Superintendent gives in detail the operations and financial condition of the Water Department.

The Board of Aldermen requested the Water Department to arrange their program for the year, so as to put \$30,000.00 in the Sinking Fund to help retire bonds that are due next year.

By carefully arranging our program for the year, we were able to do considerable work, and although our receipts were less and accounts receivable more, we had a balance of \$33,093.28 on December 31, 1932.

This balance deposited in the Sinking Fund leaves a balance of \$15,478.98 still due from this Department.

We are glad to report that the last piece of cement main in our system has been replaced by Cast Iron this year.

*Respectfully submitted,*

WM. H. WILSON,  
E. O. MITIGUY,  
HOWARD S. CRANE.  
*Board of Water Commissioners.*

SIXTY SIXTH ANNUAL REPORT  
OF THE  
**SUPERINTENDENT OF THE WATER WORKS**

*To the Honorable Board of Water Commissioners of the City of Burlington,  
Vermont:*

GENTLEMEN:—The following is a statement of the receipts and disbursements of the Burlington City Water Works for the year ending December 31, 1932, as taken from the books of the office.

OF OPERATIONS .....	\$ 45,363.70
---------------------	--------------

Audited and Found Correct,  
January 18, 1933,  
Francis C. Derby Co.

30 services have been transferred from old to new mains.  
 13 Services have been repaired.  
 16 services have been lowered:  
     5 on North Avenue.  
     11 on Staniford Road.

## NEW FIRE SERVICES

1 6-inch at Hagar Hardware Company.  
 3 repairs on fire services:  
     1 at J. E. Booth's.  
     1 at Chittenden County Trust Company.  
     1 at Rutland Railroad Company.

## LENGTH OF PIPE NOW IN USE

Cast iron.....	260,465 feet—about 49.52 miles
Service pipe.....	171,894 feet—about 32.57 miles
Supply pipe.....	36,252 feet—about 6.86 miles

## GATES

Gates added during the year.....	30
Total number of gates now in use.....	1,134
Number of gate valves smaller than 4-inch added during year..	2
Total number now in use.....	199

Repairs on gates have been made as follows:  
     1 at corner of Maple and Church Streets.  
     1 at corner of St. Louis and Oak Streets.  
     2 at corner of St. Paul and Maple Streets.  
     1 at corner of Pine and Kilburn Streets.  
     1 on Pine Street at Hickok Company.

Gate valves replaced as follows:  
     10 at Filtration Plant.

108 Gate Boxes have been replaced.

## WATERING TROUGHS

Two watering troughs are still installed: One at Battery Park and one on Pine Street near the Venetian Blind Company.

## CURB STOPS

Six curb stops have been replaced at the following places:  
     1 at corner of College and Pine Streets.

- 1 at corner of Beach and Willard Streets.
- 2 on Shelburne Road
- 1 on Intervale Avenue.
- 1 on Hickok Place.

### STAND PIPES

Two repairs have been made on Standpipes as follows:

- 1 on corner of Hyde and North Streets.
- 1 on North Avenue at Tunnel.

### HIGH SERVICE

District supplied south side of Colchester Avenue from University Place to East Avenue, East Avenue, Main Street from Summit Street to University Place, Mansfield Avenue and from Mansfield Avenue to North Prospect Street on Loomis, Wilson Street, and North Street to North Prospect Street, South Prospect Street, south of Main Street, Summit Street, University Place and Williston Road, and Overlake Park.

The Consumption on the high service as indicated by the amount measured to consumers through meters was 42,790,500 gallons.

### LOW SERVICE PUMPING STATION

1932	Water Pumped
January.....	42,506,000
February.....	39,117,000
March.....	42,723,000
April.....	45,485,000
May.....	48,420,000
June.....	46,133,000
July.....	46,757,000
August.....	54,959,000
September.....	48,648,000
October.....	44,940,000
November.....	41,157,000
December.....	43,310,000
Total 1932.....	544,155,000
Total 1931.....	567,222,000
Decrease.....	23,067,000

Daily average.....	1,490,836
Daily average 1931 .....	1,554,033

Average daily consumption per capita 59.6 gallons.

Average daily run 11 hours, 57 minutes.

One hundred and two curb and gate boxes were raised or lowered, extended and wholly or partly replaced.

The department responded to 358 calls to open or shut the stops at curb. There are 28 two-inch stand pipes available for street sprinkling.

There are now in use 4,949 meters, an increase of 52 over last year. Twenty-six meters were frozen, thirty-seven meters were spoiled by hot water, and 977 were removed and replaced for other reasons, such as street work, cleaning, repairs, etc.

Five hundred thirty-seven postals were mailed to consumers, calling

*Blasting Out Old Steam Pump Foundation in Pump Room*

attention to excessive use, waste or leakage as reported by our inspectors.

Consumption high service 1932.....	42,790,500
Consumption high service 1931.....	38,591,250

In 1931 our cash receipts for water were \$111,594.74 and in 1932 \$110,343.06 or \$1,251.68 less, this was on account of the smaller amount of water pumped in 1932, which was 23,067,000 gallons less than in 1931. The reason for this was on account of so many manufacturing plants being idle or working only part time.

The department has laid, 5,840 feet of new or replaced main this year and added 350 feet of supply pipe. We have taken out the last piece of cement main in the city, this we have been looking forward to for some time as it was in such condition that it caused much trouble.

The valves at the Filtration Plant which have been in use ever since the plant has been built have been renewed and the Blower for the Filter beds has also been removed. The wiring has all been renewed and a new and up to date switch board for the plant has been installed.

A new addressograph has been purchased for the office.

All the Gate Boxes in the City have been inspected, cleaned out, the measurements checked and where it was necessary the boxes were raised or lowered to grade. A record has been kept and one half of the city will be inspected each year after this. This we feel will save a great deal of time in shutting off water in case of a break and gives better fire protection by being sure that no valves are shut that should be open.

It was necessary to replace all of the services on Maple Street between Battery and Church Street this year on account of the new sewer that was installed on that Street.

The Street Department lowered the grade of Staniford Road about three feet which make it necessary to lower the two inch galvanized iron line on this street, so the Commissioners voted to change this to six inch cast iron. All the services on this street were also lowered and increased in size.

Five services on North Avenue which have been freezing each winter have also been lowered.

It was not possible to do as much work this year as we did last on account of a resolution passed by the Board of Aldermen asking the Water Department to arrange their program for the year so as to have \$30,000.00 to put into the sinking fund at the end of the year, to help meet the Bonded Indebtedness.

Although our total cash receipts were \$2,599.94 less and our Accounts Receivable \$1,219.99 more than last year, we had a balance of \$33,093.28 on December 31st, which went into the sinking fund.

By arrangements with Mrs. Mildram, Supt. of the Charity Department considerable labor was furnished the Water Department at different times during the summer months from her department, which made it possible to do considerable more work than could have been done without that help.

In closing I wish to thank His Honor the Mayor, the Board of Water Commissioners, and Employees of the department for their cooperation during the year.

*Respectfully submitted,*

JOSEPH E. MOORE.  
*Superintendent.*

*Pump Room after Foundation had Been Removed*

## METERS

On January 1 there were in use and in stock 5,045 meters of the following sizes and makes:

## SUMMARY OF STATISTICS

For the Year Ending December 31, 1932

In Form Recommended by the  
NEW ENGLAND WATER WORKS ASSOCIATION

Burlington City Water Works,  
Burlington, Chittenden County, Vermont.

## GENERAL STATISTICS

Population by census of 1930: 24,720.

Date of construction: 1867-1868.

By whom owned: City.

Source of Supply: Lake Champlain—Filtered.

## PUMPING STATISTICS

Builders of pumping machinery: H. B. Worthington and Watson-Stillman.

Electricity purchased from the Municipal Electric Light Plant.

Total pumpage for the year: 544,155,000.

Average head against which pump works: 289 feet.

Average dynamic head against which pumps work: 316 feet.

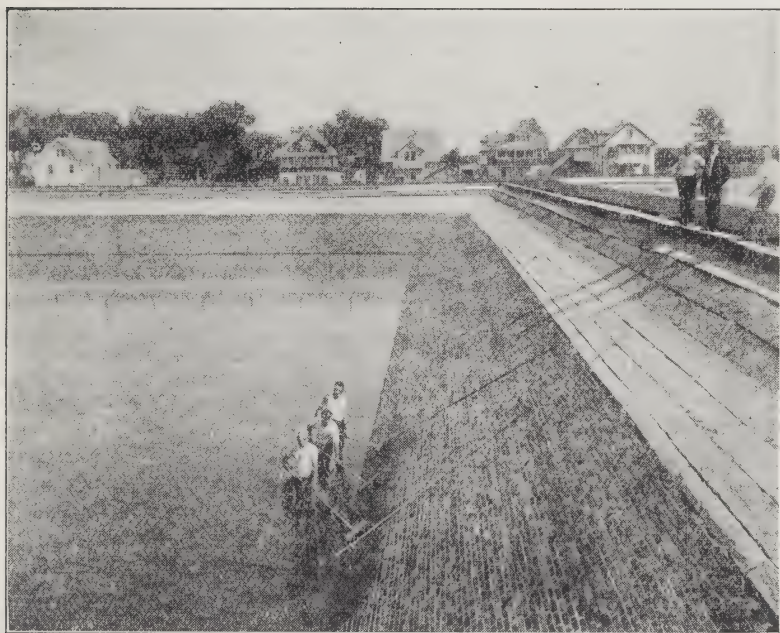

## STATISTICS OF CONSUMPTION OF WATER

1. Estimated population at date.....	25,000
2. Estimated population on lines of pipe.....	25,000
3. Estimated population supplied.....	25,000
4. Total consumption for year (gallons).....	544,155,000
5. Average daily consumption (gallons).....	1,490,836
6. Gallons per day to each inhabitant.....	59.6
7. Gallons per day to each consumer.....	59.6
8. Gallons per day to each tap.....	284.3

## STATISTICS RELATING TO DISTRIBUTION SYSTEM

## MAINS

1. Kind of Pipe: Cast Iron.
2. Sizes: From 4 to 30 inch.
3. Extended during the year: 4,944 feet.
4. Discontinued: None.
5. Total now in use: 49.52 miles.
6. Length of pipe less than 4 inches in diameter: 6.86 miles.
7. Number of hydrants added during the year: 3.
8. Number of hydrants (public or private) now in use: 315.
9. Number of stop gates added during the year: 30.
10. Number of stop gates now in use: 1,136.
11. Number of stop gates smaller than 4-inches added during year: 23.
12. Number of stop gates smaller than 4-inch: 199.
13. Number of blow-offs: 16.
14. Range of pressure of mains: Average 70-85 pounds.
15. Kind of pipe: Galvanized, cast iron and lead.
16. Sizes:  $\frac{1}{2}$  to 4 inches.
17. Extended: 1,644 feet.
18. Total now in use: 39.43 miles.
19. Number of service taps added during the year: 39; discontinued: 0.
20. Number now in use: 5,244.
21. Average length of service: 28 feet.
22. Number of meters added: 55.
23. Number now in use: 4,949.
24. Percentage of services metered: 99  $\frac{1}{2}$ .
25. Number of meters and elevators added: 0; discontinued: 0.
26. Number now in use: 27.

*Cleaning North Reservoir*

## REPORT OF THE WIRE INSPECTOR

*To the Honorable City Council of the City of Burlington:*

GENTLEMEN:—I herewith submit the following report as Wire Inspector for the year ending December 31, 1932:

Number of inspections made.....	1,141
Number of permits issued for wiring.....	414
Number of reinspections made.....	67

Owing to the lack of new construction, more time was given over to reinspecting some of the older electrical installations, which in nearly every case where defects were found, they were either repaired or re-wired and are now in good condition.

### RECOMMENDATIONS

I wish to recommend that an ordinance relating to the sale of un-approved material and appliances be passed. I have found quite a number of so called instantaneous water heaters attached to faucets which have not been approved by the Underwriters Laboratories and which will give the operator a severe electric shock at times. I understand that these water heaters have been prohibited in some cities as serious life hazards.

I would further recommend that an office be provided for the Wire Inspector, preferably in the Central Fire Station. Under the present system a part of the equipment is located at the fire station and the balance at my home, making a very unsatisfactory arrangement.

In closing this report I wish to express my appreciation to His Honor Mayor Jackson and to your Honorable Board, and to the citizens of Burlington for the courtesy accorded me during the past year.

*Respectfully submitted,*

MAX L. THURBER,  
*Wire Inspector.*

January 12, 1933.
